2019 IN BRIEF AND POST BALANCE EVENTS

- Revenue increased by 56 percent to 68 731 TEUR from 43 950 TEUR in 2018.
- Operating profit increased by 24 percent to 14 197 TEUR from 11 440 TEUR in 2018.
- Operating loss decreased to 409,6 TEUR from 2 504,4 TEUR in 2018.
- Loss after tax decreased to 1 493 TEUR from 2 427 TEUR in 2018.
- Net comprehensive income for the period: - 1 795 TEUR (2018: - 2 281 TEUR)
- Cyber1 expects to deliver a significant drop in EBIT margin before items affecting comparability, subject to COVID-19 impact.
- Daryn Stilwell appointed as Cyber1 Group new Chief Executive Officer by the board of directors at a meeting on the 19th February 2020.
- In April 2020, Cyber1 AB announced that it has discontinued its portfolio company Itway (Turkey and Greece), a leading VAD (value added-distributing) cybersecurity companies based in Greece and Turkey. The transaction sees 100% of Cyber Security 1 AB's ownership in these entities divested back to Itway S.p.A. As part of the transaction, the parties had agreed that where Cyber1 was not able to pay certain amounts that had been adversely affected by a material change in the Cyber1 share price, Itway S.p.A would have the right to reacquire the subsidiaries for a nominal amount. The Company will in due course provide an update on the wider ramifications of the unwinding of the transaction and will specifically provide an update on a course of action which will include the exercise of any of its rights under the agreements to recover monies paid to Itway S.p.A and the return of the Cyber1 shares delivered as part of the transaction. See Note 26. **A full list of Cyber1's announcements and reports can be found at www.cyber1.com.**

Managements' administration report

Details of the Parent's business

Cyber Security 1 AB (Publ) ("Cyber1") is the Parent company in the Cyber Security 1 AB Group. The company, named Cognosec AB (Publ) at the time, was listed on the Nasdaq First North Stock exchange in September 2016. It is a holding company that directly or indirectly owns the operating subsidiaries of the Cyber Security 1 AB Group.

Cyber1 is a NASDAQ-listed, agile global company with offices in UK, UAE, Europe and Africa. It operates across the public and private sectors in the Cybersecurity space and assists organisations to reduce cyber risks, become resilient to attacks, assess organisations' processes, procedures and systems for non-compliance and vulnerabilities.

Cyber1 operates across multiple public and private sector organisations including government, healthcare, retail, insurance, manufacturing and hospitality and specialises in security, risk and compliance services that allows it to offer the best in payments, communications, network and e-commerce security. Cyber1 designs, implements and manages solutions that protect critical IT infrastructure, data assets, independent product advice and professional services across all cybersecurity application areas.

The Cyber1 share register is managed by Euroclear.

Mangold Fondkommission AB was the Nasdaq First North certified advisor to Cyber1 during the year.

Consolidated earnings for the twelve months through to 31 December 2019 amounted to a loss of 1 493.0 TEUR (2018: loss 2 427.2 TEUR), of which 43.5 TEUR profit (2018: profit 47.9 TEUR) was attributable to the Non-controlling interest shareholders. Consolidated shareholders' equity at 31 December 2019 amounted to 13 582,8 TEUR (2018: 14 673,0 TEUR) of which 240,2 TEUR (2018: 196,7 TEUR) relate to equity attributable to minority shareholders.

Cyber1's loss for the 12 months up to and including 31 December 2019 amounted to 3 235,7 TEUR (2018: 1 618,8 TEUR). Equity in the Parent Company at 31 December 2019 amounted to 12 097 TEUR (2018: 14 520 TEUR).

Related party transaction

Transactions with related parties have all been executed on market terms and are further described in Note 25.

Share data

As of 31 December 2019, the Company had a total of 295 486 482 issued shares (2018: 292 235 506). The quota value amounted to 0,0000262 EUR (2018: 0,000262 EUR) per share. For more information about the Company's shares, see Note 21, 22 and 23.

Business review and going concern

The group is building up its capabilities and growing its strategic base, particularly in Europe and the EMEA Region. As such the group is reliant on support from its existing and future shareholders and has been in receipt of such cash support in 2019 and thereafter. Previous acquisitions were also funded through this mechanism and that is the expectation for the acquisitions which have already been announced to the market.

Management is fully aware of the cash position, with the expectation of future growth and support from external sources to meet its immediate needs. However, as at the reporting date, looking at its current cash position and cashflow projections for the business, the company is dependent on external funding to cover its cashflow gap. If Cyber1 cannot acquire additional external funding or, grow the business sufficiently swiftly, there is a risk that a liquidity deficit will occur. Taken as a whole, this means that there are material factors of uncertainty that, if not alleviated by the current plans' management have in place to secure funding and grow the business, it could lead to doubt regarding the ability of the company to continue to be a going concern. This may primary affect the valuation of goodwill at group level and shares in subsidiaries at parent level.

Strategy

In the Value-Added Distribution segment, Cyber1 works to maximize long term profitability, leveraging its strong market presence and trusted brand. In addition, capitalizing on its leading market position in a number of its core jurisdictions in this category, Cyber1 will maintain a continued focus to drive benefits from synergies existing and new from across the group.

In the advisory and managed services segment, Cyber1 will drive profitable growth through strong sales and marketing execution, while maintaining strict cost discipline. Cyber1 continues to adapt its assortment in order to maintain its leadership in offering high quality services with outstanding value with a focus on services in growing higher margin segments.

Cyber1 will continue to grow and establish new international markets based on Cyber1's strong and expanding service capabilities and high-quality brands it is vendor portfolio.

Financial development

The VAD business segments continued to see growth in all our markets in 2019, and growth in our Africa and Middle East businesses was particularly notable. In 2019, Cyber1's VAD business returned positive growth and delivered total growth of 87% [revenue to 56,903 TEUR (2018:30,445)].

Like-for-like organic VAD revenue increased by 65% to 26,310 TEUR (2018:15,981 TEUR), adjusted for Itway operations to be divested. Operating margin increased by 37 percent to 9,035 TEUR (2018: 6 579).

AMS (Advisory, Managed services) revenue totalled 11 850 TEUR (2018; 13 527 TEUR) and was negatively affected by the divestment of Austria business activities. However, gross profit margin increased by 6 percent compared to the prior year, and we saw positive adjusted organic growth in all entities.

Significant events during the year

During the year Cyber1 demonstrates strong underlying momentum in its core business as it closes another successful year, with the top five deals amounting to €5.4m in new business

On October 2019, Cyber1 announces a "New Multi-Year Partnership" with Armada Maritime; that's allows Cyber1's current maritime offering to be taken to the Greek and Cyprus markets alongside Armada Maritime.

Events after the reporting period

In March 2020, Cyber1 issued budgeting guidance in reviewing the business operational to mitigate and address the economic impact of COVID -19.

COVID 19 impact – Affirmed Full -Year Guidance

Cyber1 encourages organic customer growth and maintains the importance of revenue development. At the same time, the economic outlook remains uncertain and, the outbreak of the COVID-19 virus adds additional concerns regarding a slowdown in key economies that may impact customer demand negatively. Our exposure mainly to south Africa, UAE and Turkey is comparatively high, revenue loss is expected. The South Africa rand and Turkey lira remain weak against the US dollar and the Euro, thereby increasing our costs as well as price levels to customer-vendor relationship.

After considering the above and emergence of additional global economic uncertainties, we can affirm our fiscal year outlook that the Group's EBIT margin will be negatively affected by a range of 5-10%, due to implications of COVID-19.

Company reorganisation

On May 12, 2020 the Stockholm District Court (SDC) approved Cyber Security 1 AB 's application for corporate restructuring. The Law Firm Carler, appointed Administrator for the proceedings to be held on June 1, 2020. In light of current general trading conditions and consequences of the formal Chairman K Paulsen's demise, compounded with financial difficulties, has prompted the new board to initiate the corporate restructuring process.

Cyber1 will continue trading as normal during the reorganisation process and its listed status on the Nasdaq First North Growth Market exchange will not be affected. However, the Company will benefit from a moratorium from any formal action by a creditor against the Company. The period may be extended, by application of the Company to court, if a compromise with its creditors is not obtained before the end of such period.

The Board of Directors believe that its chosen course of action is the most effective mechanism to stabilise the business at this challenging time and to begin the route to achieving long term profitability for the Company.

Board and Chief Executive Officer

The Board of Directors of the Company during the year, were the following members: Kobus Paulsen (Chairman), Rt Hon. the Lord Blunkett, Patrick Boylan, Neira Jones, and Daryn Stilwell.

As of 31 December 2019, Nick Viney was serving as the Cyber1 Chief Executive Officer.

The following board directors resigned and ceased to be board members on the following dates:

- Neira Jones resigned on the 11th November 2019
- Anthony St John resigned on 25th October 2019
- Patrick Boylan ceased on 4th July 2019
- Lord Blunkett resigned on 20th February 2019

On 30 December 2019, Cyber1 announces passing of Chairman Kobus Paulsen, Founder and Chairman and Major Shareholder.

Other Events

Subsequent to the balance sheet date, the following appointments were made:

Daryn Stilwell was appointed as Chief Executive Officer, and the following Board members were appointed at and Extra General Meeting on January 28, 2020: Thomas Bennett, Robert Blase, Antoine Karam, Corne Melissen, Frank Kamsteeg, and Johan Bolsenbroek (resigned 22nd April 2020), and further are described in Note 26.

Employees

At the end of the financial year, the number of employees in the Group amounted to 198, compared with 190 at the beginning of the year. The average number of employees during the year was 197 (188), of which 0 were employed in discontinued operations.

Research and Development

With the aim of strengthening and developing Cyber1's position as one of the leading global cybersecurity providers of strong brands to the public and private sectors in Africa, Europe and the Middle East regions, the Group primarily invests its resources in the continued development of proprietary product brands and various concepts and service solutions for its customers and partners. Activities implemented during 2019 included continued product development within the framework of the Company's proprietary brands, digitisation, the development of various service concepts and customer solutions, the development of logistics and e-commerce solutions for resellers and end customers, and training for end users.

Financial and business risks

Efficient and systematic risk assessment of financial and business risks is important for the Cyber1 Group. The Group's Financial Policy establishes guidelines and goals for managing financial risks in the Group and regulates the distribution of responsibility between the Board of Directors of Cyber Security 1 AB, the CEO and the CFO as well as the Group Head of Reporting and Managing Directors of the subsidiaries. All foreign-currency management and granting of credit to customers are handled within the framework of the established policy. For a detailed account of financial and business risks and the Group's management thereof, refer to pages 7–9 and Note 20 Financial instruments and financial risk management on pages 57–61.

Future Development

Market trends in 2020 will be carefully monitored by the Group's businesses. Cyber 1 Group has good potential to continue improving its profitability in many areas. During the year, the focus will be on volume growth, increased profitability and a reduction in funds tied up in working capital in the Group. The Group companies will continue developing services and proprietary product brands, which have accounted for an increased portion of the Group's total sales in recent years.

The Group's strong balance sheet has created the right conditions for interesting corporate acquisitions. The Group's goal is for its earnings growth over a business cycle to amount to at least 5 percent annually.

Annual general meeting

The annual general meeting (AGM) is scheduled for 30th June 2020.

Proposed Appropriation of the Parent Company Current Year Loss

The below funds and proposed treatment of them is to be decided at the company's annual general meeting.

Free Equity	€ 15 255 719,39
Current year Loss	€ (3 235 689,96)
Total	€12 020 029,44

The board proposes that the available funds are carried forward.

To be brought forward € 12 020 029,44

Financial reporting

Cyber1's financial reporting for 2019 consists of financial summary and financial reports, as well as accounting policies and notes.

The financial summary consists of annual key performance measures, the financial reports consist of consolidated and Parent Company statements of comprehensive income and balance sheets, as well as changes in shareholders' equity and a cash flow statement.

The accounting policies and notes provide detailed company-specific information that thoroughly describes in further detail the company's financial position.

The Notes on pages 14 to 66 form part of these financial statements.

Notes to the financial statements

Corporate Information

These consolidated financial statements include the Parent Company, Cyber Security 1 AB (“**Cyber1**” or the “**Parent Company**”) corporate identity number 556135-4811, and its subsidiaries (“**the Group**”). Cyber1 is a Swedish public company with its registered office in Stockholm. The address to the head office is Cyber Security 1 AB (Publ), Klarabergsgatan 29 111 21 Stockholm.

This annual report, including the consolidated financial statements, was signed and approved for publication by the board of directors of Cyber1 on 17th June 2020. The statements of income and the balance sheets, for the Parent Company and the Group, included in the annual report and the consolidated financial statements, are subject to adoption by the annual general meeting on 30th June 2020.

The most important accounting principles applied in the preparation of the financial reports are set out below and, where applicable, in the following notes. Mainly, the same principles are applied for the Parent Company and the Group. The Parent Company’s accounting principles deviating from those applied by the Group, or considered important to describe, are stated under a separate heading below this note.

The financial statements are prepared under the historical cost convention.

Basis of preparation – Parent Company

Significant accounting policies Parent Company:

The financial statements of the Parent Company have been prepared in accordance with the Annual Accounts Act and RFR 2 “Reporting in separate financial statements.” RFR 2 requires the Parent Company to use the same accounting principles as for the Group, i.e., IFRS, to the extent allowed by RFR 2. There are no material differences between RFR 2 and IFRS.

The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these group financial statements.

The reporting currency for the consolidated financial statements and the parent company is Euro, which is the functional currency of the Parent Company. Unless otherwise indicated, all amounts are rounded off to the nearest thousand.

Accounting policies and explanatory notes to the financial statements

1 Significant Accounting policies

The following accounting policies have been applied consistently in dealing with items which are considered material in relation to the financial statements:

1.1 Basis of preparation and compliance with accounting standards

The consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) published by the International Accounting Standards Board (IASB), and the interpretations issued by the International Financial Reporting Interpretations Committee (IFRIC) as adopted by the EU for financial years beginning on or after 1 January 2018. In addition, the Swedish Annual Accounts Act and the Swedish Financial Reporting Board’s recommendation RFR 1 Supplementary Accounting Rules for Groups has been applied.

The Parent Company applies the same accounting policies as the Group, with the exception of those cases specified in Note 1 to the Parent Company financial statements.

1.2 Use of assessments in the financial reports

Preparing financial reports in accordance with IFRS requires that management make assessments and assumptions that affect the accounting principles and reported amounts for assets, liabilities, revenues and costs. The assessments and assumptions are based on historical experience and a number of other factors that may be considered relevant under the prevailing conditions. The actual outcome may deviate from these assessments and assumptions. Assessments and assumptions are reviewed on a regular basis with changes in assessments recognized in the applicable period.

Assessments made by management on the application of IFRS that have a significant impact on financial reports, and estimations made that could entail material adjustments in subsequent years’ financial reports, are described in greater detail in Note 2 Critical estimates and judgements

Notes to the financial statements (continued)

Accounting policies (continued)

1.3 New standards, amendments and interpretations

Implementation of new financial reporting standards

On 1 January 2019, Cyber1 implemented IFRS 16, Leases by applying the modified retrospective approach. The cumulative effect is recognised at the date of initial application, 1 January 2019, and the right-of-use assets are recognised at the same value as the lease obligations. Comparative figures are not restated.

TEUR	€'000
Operating lease commitments disclosed as at 31 December 2018	454
Discounted using the group's incremental borrowing rate of 0.66-6.26%	(14)
Part of contracts reassessed as service agreements	(6)
Adjustments as a result of a different treatment of extension/termination options	80
Lease liabilities recognised at January 1, 2019	514

All leases have been recognised in the balance sheet with a corresponding lease liability except for short-term leases and leases for low value assets. Lease contracts with remaining life of less than 1 year as at 1 January 2019 are not included. Hindsight has been applied when determining the lease terms. Leased assets are depreciated over the lease term, and payments are allocated between instalments on the lease liability and interest expense, classified as financial expenses. The lease term used for the lease contracts is the non-cancellable period with addition of periods covered by an option to extend the lease if exercise of the option is considered reasonably certain on inception of the lease. The impact of IFRS 16 is shown in the table on the below.

TEUR	Q4 2019			FY 2019		
	Previous practice	IFRS16 Impact	New practice	Previous practice	IFRS16 Impact	New practice
Income statement						
Revenue	24 206,3	-	24 206,3	68 731,2	-	68 731,2

Cash flow statement

Cash flow from operating activities, continuing operations	1 861,4	59,9	1 921,2	-1 915,4	234,1	-1 681,2
Cash flow from financing activities, continuing operations	-1 371,2	-59,9	-1 431,1	437,7	-234,1	203,6

Also, we have implemented new amendments and interpretations on existing IFRS standards, including IFRIC 23, Uncertainty over income tax treatments. These changes have no impact on Cyber1.

Due to the coming change of reference interest rates (interbank offered rates),” Interest Rate Benchmark Reform amendments to IFRS 9, IAS 39, and IFRS 7”, the Group has decided to early adopt these amendments of IFRS 9. The financial reports have not been impacted.

Other new amendments and interpretations applicable as of January 1, 2019 have not had any material effect on the Group’s financial result or position.

New IFRSs and interpretations which have not yet been applied

New standards, changes in standards and interpretations of standards apply from 2020 or later and have not been applied in these financial reports.

Changes in IFRS standards, amendments and interpretations of existing standards applicable as of January 1, 2020 are deemed as not having any effect on the Group’s financial result or position. Effective changes in IFRS as of 2020 pertain to amendments to IFRS 3 and definition of a business, amendments to IAS 1 and IAS 8 regarding definition of material.

More information on the new reportable segments and presentation of restated financial information of 2019 in line with the new segment reporting is found in *Note 5 Segment information*.

1.4 Basis of consolidation

The consolidated financial statements include the Parent Company and its subsidiaries. The financial statements of the Parent Company and the subsidiaries that are a part of the consolidated financial statements refer to the same period and are prepared in accordance with the same accounting policies.

The consolidated financial statements include the financial statements of the Parent and its subsidiary undertakings made up to 31 December 2019. The acquisition method of accounting has been adopted. Under this method, the results of subsidiary undertakings acquired or disposed of in the year are included in the consolidated profit and loss account from the date of acquisition or up to the date of disposal.

Subsidiaries are entities controlled by the Group. The Group controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and can affect those returns through its power over the entity. In assessing control, the Group takes into consideration potential voting rights that are currently exercisable. The acquisition date is the date on which control is transferred to the acquirer. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. Losses applicable to the non-controlling interests in a subsidiary are allocated to the non-controlling interests even if doing so causes the non-controlling interests to have a deficit balance.

Intra-group balances and transactions, and any unrealised income and expenses arising from intra-group transactions, are eliminated. Unrealised gains arising from transactions with equity-accounted investees are eliminated against the investment to the extent of the Group’s interest in the investee. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

Notes to the financial statements(continued)

Accounting policies (continued)

Basis of Consolidation(continued)

Acquisition method of accounting

The acquisition method of accounting is used to account for all business combinations, regardless of whether equity instruments or other assets are acquired. The consideration transferred for the acquisition of a subsidiary comprises the:

- fair values of the assets transferred
- liabilities incurred to the former owners of the acquired business
- equity interests issued by the group
- fair value of any asset or liability resulting from a contingent consideration arrangement, and
- fair value of any pre-existing equity interest in the subsidiary.

Identifiable assets acquired, and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. The group recognises any non-controlling interest in the acquired entity on an acquisition-by-acquisition basis either at fair value or at the non-controlling interest's proportionate share of the acquired entity's net identifiable assets. Acquisition-related costs are expensed as incurred.

- The excess of the consideration transferred,
- amount of any non-controlling interest in the acquired entity, and
- acquisition-date fair value of any previous equity interest in the acquired entity

over the fair value of the net identifiable assets acquired is recorded as goodwill. If those amounts are less than the fair value of the net identifiable assets of the subsidiary acquired, the difference is recognised directly in profit or loss as a bargain purchase. Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present value as at the date of exchange. The discount rate used is the entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Contingent consideration is classified either as equity or a financial liability. Amounts classified as a financial liability are subsequently remeasured to fair value with changes in fair value recognised in profit or loss. If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquire is remeasured to fair value at the acquisition date. Any gains or losses arising from such remeasurement are recognised in profit or loss.

Non-controlling interests

In connection with acquisitions of less than 100 percent, when a controlling influence is achieved, non-controlling interests are determined either as a proportional share of the fair value of identifiable net assets excluding goodwill or at fair value. Non-controlling interests are recognized as a separate item in the Group's equity. The Group's profit or loss and every component of other comprehensive income are attributable to the shareholders of the Parent and to non-controlling interests. Losses attributable to noncontrolling interests are recognized even if this results in a negative balance. Subsequent acquisitions up to 100 percent and divestments of participations in a subsidiary that do not lead to a loss of controlling influence are recognized as equity transactions.

Discontinued operations

Divested operations are reported as discontinued operations if they represent a separate major line of business or geographical area of operations that comprises operations and cash flow that can be clearly distinguished, operationally and for reporting purposes from the rest of the Group. The post-tax profit or loss from discontinued operations and the gain or loss from the sale is presented in a single amount in the income statement as of the transaction date or as of the date when management is committed to a plan to sell and hence operations to be discontinued are reclassified as held for sale. When a business operation is discontinued or classified as held for sale and reported as such prior period income statements are restated. Prior period balance sheets are not restated.

Classification etc.

Non-current assets and non-current liabilities in the Parent Company and the Group essentially consist of amounts that are expected to be recovered or paid after more than 12 months, from the reporting date. Current assets and current liabilities essentially consist of amounts that are expected to be recovered or paid within 12 months, from the reporting date.

Notes to the financial statements(continued)

Accounting policies (continued)

Translation of foreign subsidiaries

The Group companies prepare their financial statements in their functional currency, i.e. the currency used in the primary economic environment in which they mainly operate. These reports provide the basis for the consolidated accounts which are prepared in Euro, which is the functional currency of the Parent Company and the presentation currency. The income statements and balance sheets of foreign subsidiaries have been translated, from their respective functional currency, to the presentation currency of the Group. All items in the income statements have been translated at the average rate for the reporting period, while assets and liabilities in the balance sheets have been translated at the closing rate. Translation differences are reported in other comprehensive income.

Certain long-term financing related to subsidiaries, where a settlement is not considered to take place in the foreseeable future, is considered as an increase in the Parent Company's net investment in the subsidiaries. Taking the tax effect into consideration, exchange gains and losses are reported in other comprehensive income.

1.5 Intangible assets

An intangible asset is an identifiable non-monetary asset that lacks physical substance. Intangible assets that are identified and measured separately from goodwill from business combinations may include trademark-related, customer-related, contract-related and/or technology-related assets. Typical marketing and customer-related assets are trademarks and customer relationships. Customer contracts and customer relationships are attributable to expected customer loyalty and the cash flow that is expected to arise over the remaining useful lives of these assets. The cost for this type of intangible asset consists of the fair value on the acquisition date, calculated according to established valuation methods.

Development costs are recognised as an intangible asset only if it is sufficiently probable that the development project will generate economic benefits in the future and the cost of the asset can be measured reliably. The cost of capitalised development costs includes only expenses directly attributable to the development project. Other internally generated intangible assets are not recognised as assets. Instead, the costs are recognised as an expense in the period in which they arise.

Separately acquired intangible assets are recognised at cost less accumulated amortisation and impairment.

All intangible assets are amortised on a straight-line basis over their estimated useful lives and are reviewed on every balance sheet date. Amortisation begins when the asset is available for use. Certain trademarks have an unlimited lifetime and are not amortised at all. Intangible assets with an indefinite useful life and goodwill are systematically tested for impairment at each balance sheet date.

1.6 Business combinations and Goodwill

Business combinations are recognised according to the acquisition method. When a business combination occurs, the company's assets (including previously unrecognised intangible assets) and liabilities (including contingent liabilities and excluding future restructuring costs) are identified and measured at fair value.

If the consideration paid by the Group is greater than the fair value of the identified net assets, the difference is recognised as consolidated goodwill. Goodwill is continuously measured at cost less accumulated impairment. Since it is not possible to individually test goodwill for impairment, goodwill is allocated to one or more cash-generating units, depending on how the goodwill is monitored for internal control purposes. Cyber1 has allocated goodwill to three cash-generating units: Africa, Middle East and Europe.

Goodwill is not amortised but is instead tested for impairment annually. *See Note 11 Goodwill and Impairment testing of goodwill.*

1.7 Tangible fixed assets and depreciation

Property, plant and equipment are physical assets that are used in the Group's operations and have an expected useful life exceeding one year. Property, plant and equipment are initially measured at cost and are depreciated on a straight-line basis over their estimated useful lives. When property, plant and equipment are recognised, any residual value is taken into account when the depreciable amount of the asset is determined. Depreciation begins when the asset is ready to be taken into use. Land is not depreciated. Property, plant and equipment are derecognised from the balance sheet on divestment or when no future economic benefits are expected from either their use or their sale. Any gains or losses are calculated as the difference between the sale proceeds and the asset's carrying amount. The gain or loss is recognised in profit or loss as other expenses or other income in the accounting period when the asset was divested.

The residual value, useful life and depreciation rate of an asset are reviewed at the end of each financial year and adjusted, if necessary, for subsequent periods.

Customary costs for maintenance and repairs are expensed as incurred. However, costs related to significant renewals and improvements are recognised in the balance sheet and depreciated over the remaining useful life of the underlying asset.

Accounting policies (continued)**Tangible fixed assets and depreciation (continued)**

Depreciation is charged to the income statement on a straight-line basis over the estimated useful lives of each part of an item of property, plant and equipment. The estimated useful lives are as follows:

- Improvement leasehold property over 6 years
- Equipment and other similar equipment over 3 years

Depreciation methods, useful lives and residual values are reviewed at each balance sheet date.

1.8 Impairment of Intangible and Tangible fixed assets

If the Cyber1 Group sees internal or external indications that the value of an asset has declined, the asset is to be tested for impairment. For goodwill and assets with indeterminable useful lives, such impairment testing is to be carried out at least annually, regardless of whether there is evidence of impairment or not. If an asset cannot be tested separately, it is assigned to a cash-generating unit to which identifiable cash flows can be allocated.

An impairment loss is to be recognised for an asset or a group of assets (cash-generating units) if the carrying amount is higher than the recoverable amount. The recoverable amount is the higher of value in use and net realisable value. Impairment losses are recognised in profit or loss.

For all assets except goodwill and intangible assets with indeterminable useful lives, an assessment is made on each balance sheet date as to whether there is an indication that an earlier impairment loss, in whole or in part, is no longer justified. If the assumptions underlying the calculation of an asset's recoverable amount have changed, the carrying amount of the asset or assets is increased to its recoverable amount. Such a reversal is to not to exceed the amount the company would have recognised after depreciation and amortisation if the impairment had not been recognised. The reversal is recognised in profit or loss unless the asset is recognised in a restated amount in accordance with another standard.

The carrying amounts for the Group's assets, with the exception of financial assets, assets held for sale and disposal groups reported in accordance with IFRS 5, inventories, plan assets used for the financing of employee benefits and deferred tax assets, are tested in accordance with IAS 36 on each reporting date to evaluate whether there is an indication of an impairment. Should such an indication exist, the asset's recoverable amount is assessed. An impairment charge is recognized in the income statement when the carrying amount exceeds the calculated recoverable amount.

Goodwill is allocated to different cash-generating units. If the allocation of goodwill cannot be completed before the end of the year during which the acquisition was carried out, the initial allocation should then be carried out before the end of the financial year following the year when the acquisition was carried out. In such cases, amounts relating to non-allocated goodwill and the reason why they have not been allocated should be stated. Impairment of goodwill and intangible assets with indefinite useful lives is not reversed.

For goodwill and other intangible assets with an indeterminable useful life and intangible assets that are not yet ready for use, their recoverable amount is calculated annually, or when an impairment is indicated. The recoverable amounts, defined as the higher of value in use and fair value less cost of disposal, are normally determined on the basis of value in use, applying discounted cash flow calculations. An impairment charge against the income statement is made when the carrying amount exceeds the recoverable amount. For the purpose of impairment testing, goodwill and trademarks with indeterminable life is allocated to the lowest level of groups of cash generating units based on product groups and geographical markets, at which it is monitored by management. For more information on the Group's goodwill and impairment testing see *Note 11 Intangible assets*

Reversal of an impairment loss recognised in prior periods for assets other than goodwill are recognised when there is an indication that an impairment loss recognised in prior periods no longer exist or may have decreased. An impairment loss recognized for goodwill is not reversed in subsequent periods.

Intangible assets within Cyber1 essentially pertain to goodwill, customer relationship and trademarks. Assessments are made on an ongoing basis to ensure that the book value of goodwill, customer relationship and trademarks does not exceed their recoverable amount. Intangible assets with indefinite useful lives are not amortized, but instead tested for impairment at least annually or when circumstances indicate that the value of the intangible assets is impaired. Impairment tests include significant judgements made by management, such as assumption of projected future cash flows used in the valuation of the assets. Future events could cause management to conclude that impairment indicators exist and that an intangible asset should be impaired. An impairment loss could have a material impact on the financial condition and result of operations. The Group's intangible assets as of December 31, 2019 amounted to 4 400,4 TEUR, and amortizations and impairment charge amounted to 332,4 TEUR. The amount for goodwill, which has been included in intangible assets, amounted to 7 609,4 TEUR. For further information on impairment test of intangible assets see Note 11 Intangible assets

Notes to the financial statements(continued)

Accounting policies (continued)

1.9 Parent Company Investments

Fixed assets investments in the parent consist of investments in subsidiaries and are stated at cost less provision for diminution in value

1.10 Pensions

The group operates only defined contribution pension plans. For defined contribution plans, the group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The group has no further payment obligations once the contributions have been paid. The contributions are recognised as employee benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in the future payments is available. The pension costs charged in the financial statements represent the contributions payable by the group during the year.

1.11 Recognition of foreign currency exchange effects

Transactions denominated in a currency other than the Group’s functional currency are restated at the rate prevailing on the transaction date. Assets and liabilities denominated in a currency other than the Group’s functional currency are restated at the closing day rate. Exchange differences are recognised in profit or loss as they arise.

Receivables and liabilities in foreign currency

Receivables and liabilities denominated in foreign currency have been restated at the closing day rate. Exchange gains and losses pertaining to operating receivables and liabilities are recognised in operating profit. Exchange differences related to financial assets and liabilities are recognised in financial expenses in net financial items. As of 1 January 2019, exchange differences related to inter-company financial assets and liabilities are recognised in other comprehensive income.

Exchange Rate

Country	Currency	Average rate		Closing rate	
		2019	2018	December 31, 2019	December 31, 2018
Dubai	AED	4.108	4.337	4.119	4.203
UK	GBP	0.873	0.885	0.850	0.898
Kenya	KES	112.997	118.628	112.536	115.774
South Africa	ZAR	16.122	15.595	15.745	16.458
USA	USD	1.118	1.181	1.121	1.144
Sweden	SEK	10.586	10.254	10.474	10.213
Turkey	TRY	6.347	5.687	6.669	6.046

1.12 Lease contracts

From January 1, 2019 lease contracts are recognized as right-of-use assets and lease liabilities on the Group’s balance sheet and are affected by management’s judgement and estimates of certain variables that have a direct impact on the reported balances. The most significant is the assumption on the discount rates applied in the measurement of the right-of-use assets and the corresponding lease liabilities. Other judgements that may have a significant impact on the reported balances are assessments of the likelihood of using or not using extension and termination options in lease contracts. The assessment of utilizing or not utilizing extension and termination options impact the lease period of future lease payments included in the measurement of the lease liabilities and the related right-of-use assets. As per December 31, 2019, the Group’s lease liabilities amounted to 534,9 TEUR and corresponding balance for the right-of-use assets amounted to 449,9 TEUR. For further information on the Group’s accounting principles and methodology for the measurement of lease liabilities and right-of-use assets see Note 1 Accounting principles and section Leases and details of the Group’s right-of-use assets and lease liabilities are presented in Note 13 Leases.

Notes to the financial statements(continued)

Accounting policies (continued)

1.12 Leases contract (continued)

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker who is the chief executive officer. The operating segments are Africa, Middle East and Europe.

Leases are classified in the consolidated financial statements as either finance or operating leases. A finance lease exists when the financial risks and rewards of ownership are essentially transferred to the lessee.

Assets that are leased under finance leases are recognised as noncurrent assets in the balance sheet and are initially measured at the lower of the fair value of the lease object and the present value of the minimum lease payments when the lease is entered into. The obligation to pay future lease payments is recognised as non-current and current liabilities. The leased assets are depreciated over the useful life of the asset in question, while the lease payments are recognised as interest and repayment of the liability.

Leases where the lessor retains essentially all of the risks and rewards of ownership are classified as operating leases. Operating lease payments.

1.13 Classification and Measurement

Financial assets

Debt instruments: The classification of financial assets that are debt instruments is based on the Group's business model for managing the asset and the nature of the contractual cash flows.

Instruments are classified as follows:

- amortised cost
- fair value through other comprehensive income, or
- fair value through profit or loss.

The Group's debt instruments are classified at amortised cost

Financial assets classified at amortised cost are initially measured at fair value plus transaction costs. Accounts receivable and lease receivables are initially recognised at their invoiced amount. After initial recognition, the assets are measured according to the effective interest method. In accordance with the business model, assets classified at amortised cost are held for the purpose of collecting the contractual cash flows, which exclusively comprise payments of the principal and interest on the outstanding principal. The assets are covered by a loss allowance for expected credit losses.

Derivatives: Classified at fair value through profit or loss. The Group does not apply hedge accounting.

Fair value is determined according to the description in Note 20 Financial instruments and financial risk management.

Financial liabilities

Financial liabilities are classified at amortised cost with the exception of derivatives. Financial liabilities recognised at amortised cost are initially measured at fair value including transaction costs. After initial recognition, they are measured at amortised cost according to the effective interest method.

Implementation of IFRS 9

On 1 January 2018, the group implemented IFRS 9 which allows for an assessment of impairment needs regarding impairment of financial assets measured at amortized cost, including trade receivables and contract work, according to the simplified expected credit loss model. The model entails that the expected loss over the asset's useful life is recognized immediately in the income statement and monitored on an ongoing basis according to the group's risk management until realization. Impairment is computed based on expected loss rates which are stated individually, distributed by geographical location. Loss rates are computed on the basis of historical data. This data is based on expected loss over the total maturity of the amount receivable, corrected for estimates of the effect of expected changes in relevant parameters, for instance financial development, political risks etc. on the market in question.

1.14 Cash and Bank Balances

Cash and current bank balances in the balance sheet consist of bank deposits, available cash and demand deposits with a maturity of three months or less from the date of acquisition. Cash and bank balances are subject to the requirements for a loss allowance for expected credit losses.

Notes to the financial statements(continued)

Accounting policies (continued)

1.15 Financial liabilities

The Group's financial liabilities are divided into two categories:

- Financial liabilities measured at fair value through profit or loss
 - Held-for-trading financial liabilities
 - Financial liabilities initially measured at fair value ("fair value option")
- Financial liabilities measured at amortised cost

Financial liabilities measured at fair value through profit or loss

Some of the Group's acquisitions include additional purchase prices. These are recognised as a financial liability measured at fair value through profit or loss. Additional purchase prices have been classified at level 3 since there is no observable market data to apply.

Changes in the value of financial liabilities that are measured at fair value ("fair value option") and are attributable to changes in the credit risk associated with the liability are to be recognised in other comprehensive income.

Financial liabilities measured at amortised cost

Liabilities are initially recognised at fair value less transaction costs. In subsequent periods, these liabilities are recognised at amortised cost in accordance with the effective interest method.

Fees paid for loan commitments and borrowings (commitment fees) are recognised as transaction costs and are allocated over the term of the loan commitments/loans in profit or loss. In cases where quoted information/inputs are not available in order to measure financial instruments at fair value, established valuation methods that can be more or less dependent on quoted information/inputs are used.

In some cases, valuation methods based on the company's own assumptions and estimates are applied. The fair values of financial assets and liabilities are assumed to be their nominal values for those assets and liabilities with a term of less than one year. The fair values of financial liabilities are their discounted cash flows. Discounting is carried out at the interest rate that is available to the Group for similar financial instruments.

Purchases and sales of financial instruments are recognised on the trade date, which is the date on which the Group commits to purchase or sell the financial instrument. Financial instruments are derecognised when the right to receive or pay cash flows attributable to the financial instrument expires or has been transferred, or the Group has explicitly transferred all risks, allocations and obligations entailed by the holding of the financial asset or liability.

Financial Derivatives and Hedge Accounting

Derivative financial instruments are measured initially and subsequently at fair value. Changes in fair value are recognised through profit or loss unless they comprise part of an effective hedging relationship and hedge accounting is applied. Once a derivative contract has been entered into, the Group chooses to classify the derivative as a fair value hedge, a cash flow hedge or a hedge of a net investment in foreign operations. If a fair value hedge exists and the criteria in IFRS 9 have been met, the changes in value are recognised in profit or loss together with changes in the value of the hedged item in the balance sheet. Changes in the value of derivatives that comprise part of an effective hedging relationship are recognised as other comprehensive income. The accumulated change in value for this type of derivative is reversed to profit or loss in the same period in which the hedged item affects profit or loss.

When a hedging instrument is sold, terminated, exercised, revoked or otherwise ceases to meet the criteria for hedge accounting, any gains or losses that have been recognised in other comprehensive income, and ultimately recognised as an adjustment of either expenses or revenue when the planned transaction or assumed obligation is realised, are recognised in profit or loss. However, if a planned transaction or an assumed obligation is no longer expected to occur, the accumulated gain or loss that has been recognised in other comprehensive income for the period in which the hedge applied is immediately transferred to profit or loss.

Cyber1 does not apply hedge accounting.

Impairment of Financial Assets

With the exception of financial assets classified at fair value through profit or loss, the Group's financial assets are subject to impairment for expected credit losses. In addition, impairment also encompasses contract assets not measured at fair value through profit or loss. The simplified impairment method can be applied for all of Cyber1's financial assets. In accordance with IFRS 9, impairment losses are recognised prospectively, and a loss allowance is recognised when there is exposure to credit risk, usually on initial recognition. Expected credit losses reflect the present value of all deficits in cash flows attributable to expected losses, either for the next 12 months or for the expected remaining term of the financial instruments, depending on the type of asset and on potential credit deterioration since initial recognition.

Notes to the financial statements(continued)

Accounting policies (continued)

Impairment of financial assets (continued)

Expected credit losses reflect an objective, probability-weighted outcome taking into consideration multiple scenarios based on reasonable and well-founded forecasts. The calculation of the impairment requirement for doubtful receivables, which are the most material financial assets subject to a loss risk, comprises a combination of a collective and an individual assessment. In the collective assessment, a provision is made for the loss risk for all accounts receivable that are more than 180 days past due. For other accounts receivable, an individual assessment of the loss risk is carried out based on the customer's ability to pay and other relevant factors for individual customers or for the specific market in which the customer operates.

On each balance sheet date, the Cyber1 Group assesses whether there are any objective circumstances that indicate that a financial asset may need to be impaired. Financial assets are recognised in the balance sheet at amortised cost, meaning the net of their gross value and the loss allowance. Changes in the loss allowance are recognised in profit or loss.

During the spring of 2020, the financial impact of the Covid-19 virus was apparent within a number of industries. As regards to our business, there has been trivial effect to date and we also have a sound pipeline in established jurisdictions, though it is difficult to make an assessment of the long-term effect as we are only in the initial phases of this situation.

1.16 Income Tax

Current tax

Current tax assets and liabilities for the current and prior periods are measured at the amount that is expected to be recovered from or paid to the respective tax authorities. The Group's current tax is calculated using the tax rates and tax laws enacted or substantively enacted on the balance sheet date.

Current tax attributable to items recognised in equity and in other comprehensive income is recognised in equity and in other comprehensive income and not in profit or loss.

Deferred tax

Deferred tax is recognised on the balance sheet date in accordance with the balance sheet method for temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognised for all taxable temporary differences:

- except when the deferred tax liability arises as a result of impairment of goodwill or when an asset or liability is recognised as part of a transaction that is not a business combination and which, at the time of the transaction, affects neither the recognised gain nor the taxable gain or loss, and
- for deductible temporary differences attributable to investments in subsidiaries, apart from cases where the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not be reversed in the foreseeable future

A deferred tax asset is recognised for deductible temporary differences, including loss carry forwards to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised.

The carrying amounts of deferred tax assets are reviewed on each balance sheet date and adjusted to the extent that it is no longer probable that sufficient taxable profit will be available to allow part of or the entire deferred tax asset to be utilised. Deferred tax assets and liabilities are measured at the tax rates that apply for the period when the asset is realised, or the liability is settled, based on the tax rates (and laws) that have been enacted or substantively enacted on the balance sheet date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax assets against current tax liabilities and the deferred tax amounts are related to the same entity in the Group and the same tax authority.

1.17 Recognition of Cash Flow

Cash and cash equivalents consist of available cash, disposable bank deposits and other short-term investments with a remaining maturity of three months or less from the date of acquisition. Cash received and paid is recognised in the statement of cash flows. Cash flow from operating activities is recognised in accordance with the indirect method.

1.18 Provision for Expected Credit Losses on Accounts Receivable

Accounts receivable are initially recognised at transaction price in accordance with IFRS 15 and thereafter at amortised cost. A loss allowance for expected credit losses is made on every balance sheet date in an amount that corresponds to the expected credit losses for the remaining term. The assessment is based on criteria that show whether the risk has changed since the initial measurement date. Loss allowances for expected credit losses are recognised in profit or loss under other operating expenses. See Note 17 Accounts receivable.

1.19 Deferred Tax assets

Deferred tax is recognised for temporary differences arising between the tax bases and carrying amounts of assets and liabilities as well as for unutilised loss carry forwards. A deferred tax asset is recognised only to the extent that it is probable it can be utilised against future profit. In the event that the actual outcome differs from the applied assumptions, or management adjusts these assumptions in the future, the value of the deferred tax assets could change.

Notes to the financial statements(continued)

Accounting policies (continued)

1.20 Revenue recognition based on individual assessment

The Group applies the percentage of completion method on an individual basis for significant customer contracts, meaning contracts with a value of more than EUR 100 thousand and a term of more than three months. The estimate of total contract costs and revenue is critical for revenue recognition and provisions for onerous contracts, and the outcome of additional invoicing may affect profit.

Revenue and cost from the sale of the Company's product and services are recognised when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and when specific criteria have been met for each of the Company's activities. Revenue from services is generally recognised in the period the services are provided, based on the services performed to date as a percentage of the total services to be performed.

Revenue from sale of licences and sale of hardware is recognised when the customer is invoiced. At the same time a corresponding cost of sale is recognised.

Advisory and system integration services at a fixed price are paid in relation to the stage of completion at the balance sheet data (percentage of completion). Completion of an assignment is determined by costs incurred to date with the estimated total expenditure. When the outcome of a contract cannot be estimated reliably, revenue is recognised only to the extent that corresponds to the contract costs incurred that are likely to be recoverable. An anticipated loss on an assignment is reported immediately as a cost.

Other income

- **Interest income** is recognised as it is earned.
- **Dividends** are recognised when the right to receive the dividend is assured.

1.21 Financing income and expenses

Financing expenses comprise interest payable, finance charges on shares classified as liabilities and finance leases recognised in profit or loss using the effective interest method, unwinding of the discount on provisions, and net foreign exchange losses that are recognised in the income statement (see foreign currency accounting policy). Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that takes a substantial time to be prepared for use, are capitalised as part of the cost of that asset. Financing income comprise interest receivable on funds invested, dividend income, and net foreign exchange gains.

Interest income and interest payable is recognised in profit or loss as it accrues, using the effective interest method. Dividend income is recognised in the income statement on the date the entity's right to receive payments is established. Foreign currency gains and losses are reported on a net basis.

2 Key accounting assessments estimates and assumptions

In preparing the financial statements in accordance with the applicable accounting policies, the Board and CEO are required to make certain estimates and assumptions that impact the carrying amounts of assets, liabilities, income and expenses. The areas where estimates and assumptions are of material importance to the Group and which may affect the financial statements are described below:

Critical Accounting Judgement: Business combinations

The acquisition of subsidiaries or operations involves that items in the acquired companies' balance sheets as well as items that have not been recognised in the acquired companies' balance sheets, such as customer relations, shall be valued at fair value. Different valuation methods based on number of assumptions are used in fair value determination. Initial accounting is determined provisionally and may be adjusted subsequently. All acquisition calculations are finalised no later than one year after the acquisition is made.

All payments to acquire a subsidiary or operation are recorded at fair value at the acquisition date, including debt related to contingent considerations. The contingent consideration is measured at fair value in subsequent periods with re-measurement through the statement of income.

IFRS Accounting Standard require Directors to form Accounting Policies that considers the implication of transactions rather than their legal form.

A list of subsidiaries is presented in note 14 Group companies.

Notes to the financial statements(continued)

2. Key accounting assessments, estimates and assumptions(continued)

Critical Accounting Judgement: Taxes

Determination of income taxes and deferred taxes when the ultimate tax determination is uncertain requires management judgement. The Group recognises deferred tax assets resulting from carried forward tax losses when the realisation of related tax benefit, due to taxable profits, is probable. However, deferred tax asset is always recognised if it can be utilised to current taxable temporary differences. The assumptions regarding future taxable profits are based on the current business plan and further estimates added by consideration for the uncertainties in the current business plan and further estimates. The Group uses estimates for recognition of liabilities for anticipated tax audit issues based on all available information at the time of recognition.

Critical Accounting Judgement: Going Concern

The group is building up its capabilities and growing its strategic base, particularly in Europe and the EMEA Region. Whilst core cash flow generation in established geographies is strong, the newly established entities require cash funding. As such the group is reliant on support from its existing and future shareholders and has been in receipt of such cash support in 2019 and thereafter. Previous acquisitions were also funded through this mechanism and that is the expectation for the acquisitions which have already been announced to the market.

Management is fully aware of the cash position, with the expectation of future growth and support from external sources to meet its immediate needs. However, as at reporting date, looking at its current cash position and cashflow projections for the business, the company is dependent on external funding to cover its current cashflow gap. If the company cannot acquire additional external funding or, grow the business sufficiently swiftly, there is a risk that a liquidity deficit will occur. Taken as a whole, this means that there are significant factors of uncertainty that could lead to extensive doubt regarding the ability of the company to continue to be going concern. This may primary affect the valuation of goodwill at group level and shares in subsidiaries at parent level.

Critical Estimate: Impairment of assets

The Group reviews each cash generating unit annually, in order to determine whether any indication of impairment exists. Where an indicator of impairment exists, a formal estimate of the recoverable amount is made, which is considered to be the higher of the fair value less costs to sell, and value in use. These assessments require the use of estimates and assumptions such as discount rates, future capital requirements, and projected growth of each operation. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm's length transaction between knowledgeable and willing parties.

Fair value for each operation is generally determined as the present value of estimated future cash flows arising from the continued use of the asset, which includes estimates such as the cost of future expansion plans and eventual disposal, using assumptions that an independent market participant may take into account. Cash flows are discounted to their present value using a pre-tax discount rate reflecting current market assessments of the time value of money and the risks specific to the asset. Management has assessed its cash generating units as comprising an independent operation, which is the lowest level for which cash inflows are largely independent of those of other assets.

An impairment test was carried out on the Group's intangible assets as on December 31, 2019. The most significant portion of the intangible and tangible fixed assets relates to the operations in Africa, Middle East and Europe. For this purpose, a discounted cash flow model has been used extending over a 5-year period. A number of variables are simulated in the model. Among the more important assumptions are growth in EBITDA and the yield required. The base assumption regarding the growth in EBITDA is 5% and the yield required is 12 % per year. The result of the base assumptions is that no impairment is required at year-end 2019.

An impairment tests of significant assets is also performed at the Parent Company level. The impairment test is based on the same model as above. The net present value of the forecasted cash flow is compared to the book values of shares and loans provided by the Parent Company. Where an impairment indicator exists, i.e. the book value exceeds the net present value of the forecasted cash flow, an impairment provision is recorded at year end. The impairment test performed as of December 31, 2019 at the Parent Company level indicated potential default on loan provided. The Parent Company have calculated 25% risk on the weighted average lifetime credit losses of the loan and made an impairment adjustment of TEUR156.7. See Note 17 Accounts receivable.

The impairment tests indicate that there is headroom between the recoverable amounts and the carrying amounts of the shares in subsidiaries as at 31 December 2019 similar to 31 December 2018. Refer to note 11 for key assumptions.

Notes to the financial statements(continued)

3 Financial Instruments and Financial Risk Management

3.1 Financial risk management in the Cyber1 Group

Cyber1 is exposed to a number of financial market risks that the Group is responsible for managing under the finance policy approved by the Board of Directors. The overall objective is to have cost-effective funding in the Group. The financial risks in the Group are mainly managed in relation to the Group's functional currency, which is EUR. The impact of the financial risks on the Group's earnings is mainly managed through a weekly exchange of non-EUR cash into EUR and, to only a limited extent, through the use of financial instruments. The main risk exposures for the Group are liquidity risk, interest rate risk, currency risk, credit risk and counterparty risk.

Carrying value and fair value of the Group's significant assets and liabilities:

Cyber1 applies IFRS 9 to classify and measure financial instruments. IFRS 13 is applied for financial instruments measured at fair value on the balance sheet which implies using a fair value hierarchy that reflects the significance of input used according to the following levels:

Level 1 - Quoted prices (unadjusted) in active markets

Level 2 - Inputs other than quoted prices that are observable, either directly or indirectly. The input data consists mainly of the compounded interest rates from interest rate swaps, basis swaps and conversions rates for variable interest rates to create relevant Cross Currency Intertest Rate Swap (CCIRS) rates. The created interest rates are used to calculate the market value by discounting the external outstanding CCIRS flows including the actual market valuation of involved currencies.

Level 3 - Inputs that are not based on observable market data.

The following table shows carrying value (including accrued interest) and fair value for each category of financial instruments, including their levels in the fair value hierarchy, at December 31, 2019. Items measured at fair value through profit and loss (FVTPL) consist of derivatives, for which hedge accounting is not applied. Derivatives attributable to cash flow hedges are measured at fair value via other comprehensive income (FVOCI) in level 2 of the fair value hierarchy. In assessing the fair values of these derivatives, the Group uses a variety of methods and makes assumptions based on market conditions at each reporting date. Quoted market prices or dealer quotes for identical or similar instruments are used. Items not valued at fair value are measured at amortized cost. All items, except loans and borrowings, have a short duration and are considered non- interest bearing, and therefore, the total carrying value of the financial instruments corresponds to the estimated fair value. The carrying amount for loans and borrowings differ from their fair value as a consequence of changes in the market interest rates, determined by using current official market quotations for our outstanding bonds or similar instruments and discounting future cash flows. The values presented are indicative and may not necessarily be realised.

The accounting principles related to financial liabilities are essentially unchanged compared with previous years.

The following table shows carrying value and fair value for financial instruments applying IFRS 9 per December 31, 2019

Carrying value and fair value							
TEUR (€'000)	Financial instruments measured at FVTPL	Financial assets measured at amortized cost	Other financial liabilities	Cash flow hedges measured at FVOCI	Other receivables and liabilities	Total carrying value	Estimated fair value

	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
FINANCIAL ASSETS								
Financial assets measured at fair value through profit or loss:								
Derivative financial instruments – hedge accounting	-	-	-	-	-	-	-	-
Total financial assets	-	-	-	-	-	-	-	-
FINANCIAL LIABILITIES								
Financial liabilities at fair value through profit or loss:								
Contingent considerations	-	-	17	17	-	-	13	13
Derivative financial instruments – hedge accounting	-	-	-	-	-	-	-	-
Total financial liabilities	-	-	17	17	-	-	13	13

Financial instruments, level 2

The fair value of financial instruments that are not traded on an active market are determined by means of available valuation techniques. Market information is used when available. The use of corporate-specific information is avoided whenever possible. If all important in-data required for a fair value valuation of an instrument is observable, the instrument is in level 2. Specific valuation techniques used in the valuation of financial instruments include, for example, listed market prices, fair value for interest-rate swaps, calculated as the present value of estimated future cash flows based on observable yield, fair value of

currency forward contracts determined through the use of rates for currency foreign exchange contracts on the balance sheet date.

Financial instruments, level 3

The change during the year for instruments at level 3 refers to contingent considerations. Contingent considerations are valued at the fair value based on data available such as conditions set forth in the purchase agreement and current assessments of the estimated fulfilment of the conditions.

MOVEMENTS FINANCIAL INSTRUMENTS LEVEL 3		
Contingent considerations	2019	2018
Opening balance January 1	13	10
Payments	-13	-10
Reversals	-	-
Revaluations	17	13
Translation differences	-	-
Closing balance December 31	17	13

No transfer in or out of level 3 or level 2 has been made during the fourth quarter 2019. The recognised amounts are regarded as reasonable estimates for all items measured at carrying value in the balance sheet, except for loans and borrowings, as these amounts have a long time to maturity. The fair value of loans and borrowings differ from their carrying value as a consequence of changes in the market interest rates. Items not valued at fair value in the balance sheet are measured at amortized cost.

The analysis is based on all undiscounted cash flows, including estimated interest payments and expected instalments on loans. The estimates on interest are based on current market conditions.

Fair value of the loan from credit institutions (Vækstfonden) and leasing liabilities is determined to be equal to its carrying amount these items are based on market rate (level 2 in the fair value hierarchy). Fair value of short-term liabilities is determined to equal their carrying amount.

The payment obligations are expected to be settled through cash inflows from operating activities and through cash from capital injections in previous years

No financial instruments are measured to fair value as at 31 December 2019 and 2018.

The different levels of fair value are defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1)
- Inputs other than quoted market prices included in Level 1 that are observable for the asset or liability, either directly in the form of quoted prices or indirectly, i.e. derived from quoted prices (Level 2)
- Inputs for the asset or liability which are not based on observable market data (non-observable inputs) (Level 3).

The fair values of financial instruments which are not traded in an active market are determined with the help of valuation techniques. Market data is used as far as possible when such data is available. If all significant inputs required for the fair value measurement of an instrument are observable, the instrument belongs to Level 2. In cases where one or several significant inputs are not based on observable market information, the instrument is classified as Level 3.

(a) Customer Credit risk

Management’s assessment is that there is no significant concentration of credit risk with any individual customer, counterparty or geographical region for Cyber1.

Notes to the financial statements (continued)

3. Financial Instruments (continued)

3.1 Financial risk factors, (a) Credit risk (continued)

The Group's exposures to credit risk as at the end of the reporting periods based on carrying amounts as reported in the statement of financial position for on-balance sheet financial assets are analysed as follows:

	2019	2018
	€'000	€'000
Trade and other receivables (Note 15)	26 951,0	17 848,6
Cash and cash equivalents	2 437,6	5 924,2

Credit concentration risk also exists with respect to the Group's cash equivalents, which are held with a reputable financial institution of high-quality standing or rating.

As at 31 December 2018, the Company's trade and other receivables were fully performing. The Company assesses the credit quality of its trade and other receivables considering the financial position, experience and other factors relating to the debtor.

The concentration of credit risk for trade receivables at the balance sheet date by geographic region was:

	2019	2018
	€'000	€'000
Africa	6 884,6	2 801,9
Middle East and UAE	8 872,7	3 326,5
Europe	11,193,7	11,720,2
Total	26 951,0	17 848,6

There are no significant concentrations of credit risk within the Group unless otherwise disclosed. The maximum credit risk exposure relating to financial assets is represented by carrying value as at the balance sheet date. The Group has established procedures to minimise the risk of default by trade debtors including credit checks undertaken before a customer is accepted. Historically, these procedures have proved effective in minimising the level of impaired and past due debtors.

Credit quality of financial assets and impairment losses

The aging of trade receivables at the balance sheet date was:

Credit Risk re: Movement in allowance for Impairment

	Gross	Impairment	Gross	Impairment
	2019	2019	2018	2018
	€	€	€	€
not past due	14 420,2	-	6 810,1	-
Past due [0-30 days]	2 887,9	-	1 726,6	-
Past due [31-120 days]	9 642,9	-	9 311,9	-
More than 120 days	156,7	156,7	332,5	332,5
Total	27 107,7	156,7	18 181,1	332,5

An assessment of the recoverability of Trade and other receivables shows an impairment indicator of 156,7 TEUR overdue trade receivables during the year (2018: €332,5). Therefore, the carrying value of Trade and other receivables fair value as at 31 December 2019 is 26 951,0.

Notes to the financial statements(continued)

3. Financial Instruments (continued)

3.1 Financial risk factors, (a) Credit risk (continued)

The movement in the allowance for impairment in respect of trade receivables during the year was as follows:

	Group		Parent	
	2019	2018	2019	2018
	€	€	€	€
Balance at 1 January	-	-	-	-
Impairment loss recognised	156,7	332,5	156,7	332,5
Impairment loss reversed	-	-	-	-
Balance at 31 December	<u>156,7</u>	<u>332,5</u>	<u>156,7</u>	<u>332,5</u>

Provision for Expected Bad debt Losses

	2019	2018
Opening balance	332,5	-
Acquired companies	-	-
Change in provision during the year	156,7	332,5
Reversal of previous provisions	-332,5	-
Realised loss on previously reserved accounts receivable	-	-
Exchange differences	-	-
Balance at 31 December	<u>156,7</u>	<u>332,5</u>

As at 31 December 2019, trade receivables at an amount of TEUR 16 667,8 (TEUR 11 038,5 in 2018) were past due but not impaired. As at 31 December 2019, due receivables relate to a number of independent customers where there is no recent history of non-payment have been received in 2020

The remaining trade and other receivables do not contain impaired assets as these are not past due. Based on the credit history of these other classes, it is expected that these amounts will be received when due. The group does not hold any collateral in relation to these receivables.

Transaction Exposure

The Cyber1 Group's policy for transaction exposure is to minimise the impact of short-term changes in foreign exchange rates for currencies other than EUR by hedging the transaction exposure on a case-by-case basis. The main transaction exposures arise in EUR against local currencies.

Transaction Risk and Hedges in the Main Currencies

Cyber1 has outstanding hedges for its transaction exposure in SEK/EUR.

Hedge accounting is not applied.

Notes to the financial statements (continued)

3. Financial Instruments (continued)

3.1 Financial risk factors (continued)

(b) Market Risk

Foreign exchange risk

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities which are denominated in a currency that is not the entity's functional currency. The Group takes on exposures to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. Foreign exchange risk is the risk to earnings and value caused by a change in foreign exchange rates. To reduce its currency exposure, the Group generally matches its asset and liability positions represented by the amounts due by acquirers and other payment service providers and the relative amounts due to the merchants.

The net open currency exposure at the end of the reporting period is detailed below.

31 December 2019	Sterling	US Dollar	SEK	TRY	KES	AED	ZAR	Total
Sensitivity to Change in exchange rate	'€ (000)	'€ (000)	'€ (000)	'€ (000)	'€ (000)	'€ (000)	'€ (000)	'€ (000)

Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. As the Company has no significant interest-bearing assets that mature in the long-term, its income and operating cash flows are substantially independent of changes in market interest rates. The Company’s cash flow interest rate risk arises from cash and cash equivalents. Up to the reporting date, the Company did not have any hedging policy with respect to interest rate risk as exposure to such risk was not deemed to be significant by the directors since these assets are of a short-term nature.

Management considers the potential impact on profit or loss of a defined interest rate shift that is reasonably possible at the reporting date to be immaterial. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to fair value interest rate risk.

Notes to the financial statements (continued)

3. Financial Instruments (continued)

3.1 Financial risk factors (continued)

(c) Liquidity risk

The Company is exposed to liquidity risk in relation to meeting future obligations associated with its financial liabilities, which comprise principally settlement processing obligations and other liabilities. Prudent liquidity risk management includes maintaining sufficient cash and committed credit lines to ensure the availability of an adequate amount of funding to meet the Company's obligations.

The Company manages this risk, by monitoring future cash flows together with changes in available liquidity on a regular basis. Senior management is updated on a regular basis on the cash flow position of the Company.

The Company's financial projections reveal that the financial performance of the Company is expected to improve in the foreseeable future thereby generating net cash inflows after the end of the reporting period.

3.2 Capital Risk Management

The Group's capital structure should be maintained at a level that ensures the ability to advance the business in order to generate returns for the shareholders and benefits for other stakeholders, while at the same time maintaining an optimal capital structure to reduce capital costs.

To maintain or adjust the capital structure, the Group may, upon approval by the shareholders and external lenders when appropriate, vary the dividend that is paid to the shareholders, reduce the share capital to enable payments to the shareholders, issue new shares or sell assets to reduce its debt. The Group continuously analyses the relationship between debt and equity as well as the relationship between debt and equity including loans from shareholders.

NET DEBT/EQUITY RATIO

EUR thousand	Note	December 31, 2019	December 31, 2018
Interest-bearing liabilities		2 770	1 630
Cash and cash equivalents and short-term investments		-2 438	-5 924
Net debt		333	-4 294
Total equity		13 583	14 673
Total capital		13 916	10 379
Net debt/Equity ratio		0.02	-0.29

The net debt/equity ratio was 0.02 compared to -0.29 to prior fiscal year. See Note 3.3 for more information on interest-bearing liabilities.

3.3 Interest Bearing Liabilities

Maturity Analysis: Financial Liabilities

All amounts in currencies other than EUR are translated at the closing day rate and interest payments on loans with variable interest have been calculated at the closing day rate. The weighted average interest rate on external loans and borrowings, including margins and the effects of interest rate hedges, was 3.00% (3.50).

Notes to the financial statements (continued)

4 Business Combinations

Acquisitions during the year

No acquisitions of subsidiaries have been made during 2019.

Acquisitions during 2018

On January 1, 2018, Cyber1 recognised the 100 percent acquisitions of Cognosec GmbH (Austria), Intact Software Distribution (Pty) Ltd and A-tek Distribution Limited within the Group consolidation.

On June 13, 2018, Cyber1 acquired 100 percent of the shares from Itway S.p.A. two subsidiaries Itway Turkey and Itway Greece. The consideration amounted to EUR 10m and was paid in EUR 2.6m cash and EUR 8m shares.

On April 16, 2020, Cyber 1 announced that Itway S.P.A reassumed ownership of the subsidiaries Itway Turkey and Itway Greece. As part of the transaction, the parties agreed that Cyber1 paid a total of EUR 2.6m in cash and delivered a total of 16,666,666 Cyber1 shares at €0.48 per share to Itway S.p.A; pursuant to the agreements underpinning the transaction. Despite having delivered on certain aspects Cyber1 was following a protracted, and in the end unfortunately unsuccessful negotiation with Itway S.p.A, ultimately not able to honour certain post-completion conditions of the transaction. Itway S.p.A have therefore, in accordance with the terms of the agreements, notified the Company of their immediate exercise of the option to reacquire the assets. See Note 26 for further details,

2019 and 2018 the Itway Turkey and Itway Greece are included in continuing operations.

Effects of acquisition

The table below presents the acquired assets and liabilities at fair values recognized in the Group's balance sheet at the acquisition date for each of the acquisitions, including goodwill, and also the effect from the acquisitions on the Group's cash flow:

(Thousand Euro)	Fair value reported in the Group
Property, plant and equipment	104
Intangible	499
Long-term receivables and other non-current assets	-
Inventory	589
Trade receivables and current assets	10,026
Total liquid funds	1,553
Trade liabilities and other current liabilities	6,491
Deferred tax liability	1,096
Net identifiable assets and liabilities	5,184
Negative goodwill	-1,268
Group Intangible and goodwill	6,633
Total consideration paid	10,549
Less acquired liquid funds	1,553
Net effects on Group's liquid funds from acquisition	8,996

No contingent liabilities arising from the acquisition have been identified.

Notes to the financial statements(continued)

5 Segment Information

Cyber1's business segments are VAD (value-added distribution), Advisory Services and MSSP/(Managed Services) and are based on the customers' affiliation with the segments. **VAD** consist of system security, GRC solutions, incident response & forensics initial license agreements and periodic maintenance agreements covering product updates and customer support. License fee revenue included in those agreements is recognized when the product is initially delivered, whereas the license agreements' maintenance revenue is recognized over the maintenance period. Most of the license sales are usage-based and booked based on usage reports, but there are also fixed price operator agreements. The terms of these agreements vary significantly, and their revenue recognition *at a point in time* when product solutions is transferred to the customer at the expected consideration to be received for such delivery.

Advisory Services- Cyber1 offers its customers a wide range of professional advisory services, which includes legal compliance, installation and integration of various cybersecurity system components, and in general serve as outsourced staff that can be employed as needed, on demand; while **MSSP/Managed services** covers Data Security, Network Security, Gateway Security, Managed Compliance & SIEM Services, Incident Response, Business Continuity & Cyber Forensics - where we take a 'total' and long-term approach, and look at the bigger picture of IT security in organisations, is recognised at the *time of delivery of the service*.

The three main segments have been identified without aggregation of operating segments. Segment income and costs include any items that are directly attributable to the individual segment and any items that can be reliably allocated to the individual segment. Non-allocated costs refer to income and costs related to joint group functions. Assets and liabilities are not included in segment reporting.

Notes to the financial statements (continued)

Note 6 – Salaries and other Salary Remuneration (continued)

Salaries to the CEO and other senior executives are established by the Board. Salary level is to be based on market conditions in relation to qualifications and performance. In addition to fixed salary, variable remuneration may include a maximum bonus of 100% of fixed salary. This policy may be deviated from with the express consent of the Remuneration Committee. The outcome of the bonus is mainly based on the attainment of financial targets.

The company uses only premium-based pension solutions for senior executives. These pension solutions vary between 3% and 8% of annual fixed salary.

The notice period for senior executives is between three and six months. The CEO has a notice period of three months and termination benefits are paid during this period. In the event of termination of employment on the part of the company, the notice period is three months.

Other benefits include company car benefits, car allowances and health insurance.

The CEO and three other members of the Group Management Team are entitled to terminate their employment with the right to receive severance pay in accordance with the terms of their individual employment contracts if a major organizational change should occur that significantly restricts their position, and/or they are not offered equivalent employment terms.

Personnel

The average number of employees, including temporary employees, in the Parent Company during 2019 was 6, and in the Group 197. The corresponding numbers in 2018 were 6 and 188, respectively. The increase in the average number of employees primarily relates to the expansion of VAD (valued added distribution) product services in the UK and Europe.

Group employees by region are summarized in the table below:

Remuneration and other benefits to Group Management Team

Application of principles on variable salary for 2019. In order to ensure alignment with long term shareholder interests, to strengthen the retention element of the variable salary and to promote company shareholding among the Group Management Team ("GMT") the variable salary includes a cash incentive and a long-term share incentive program. The performance period for the long-term programs will be between three to five years.

- Variable salary pertains to accruals charged to the consolidated income statement during the year for short term incentive programs.
- Other benefits pertain to company cars, medical insurance, club membership and other benefits.
- Reported pension costs correspond to service costs for defined benefit pension plans and fees relating to defined contribution pension plans (excluding payroll taxes)
- During 2019 and 2018 no earnings-related compensation has been paid to the Group Management Team
- During 2019 and 2018 no severance has been paid to the Group Management Team.

Tax expense	(442,4)	(342,2)	-	-

*The applicable tax rate is the aggregate of the national income tax rates for the Groups Subsidiaries

Unused tax losses for which no deferred tax asset has been recognised amount to 2 581 TEUR.

Notes to the financial statements(continued)**10 Intangible assets**

Intangible assets contain goodwill, customer relationships and other intangible assets. Other intangible assets mainly consist of acquired technology. Amortization of intangible assets is reported in the income statement and allocated to functions as applicable. There are no intangible assets related to manufacturing processes or the like, therefore no amortization is allocated to cost of goods sold.

Goodwill

Goodwill comprises the positive amount by which the sum of (i) the cost of shares in subsidiaries, (ii) the value of non-controlling interest and (iii) the fair value of previously held equity interest exceeds the fair value of the Group's share of acquired identifiable net assets at acquisition. Goodwill is carried at cost less accumulated impairment losses. Goodwill is tested for impairment on an annual basis, or more frequently if indicated. See also section Impairment.

Customer relations and other intangible assets

Intangible assets also include Cyber1 brand, technology, brands, and customer relations. In conjunction with the acquisition of such assets, the acquisition values are reported as assets, which are amortized on a straight-line basis over the estimated useful life.

Amortisation Periods:

Software & Technology	5–10 years
Customer relations	14–20 years

Impairment

The carrying amount of a depreciated asset is tested for impairment whenever there are indications that the carrying amount might not be recoverable. If there are indications of impairment, the asset's recoverable amount is calculated. The recoverable amount consists of the higher of the value in use of the asset in operations and the value that would be received if the asset was sold to a third party, the net realizable value. Value in use consists of all incoming and outgoing payments attributable to the asset during the period it is expected to be used in operations, plus the net realizable value at the end of the useful life. If the calculated recoverable amount is less than the carrying amount, impairment is made to the asset's recoverable amount. An impairment loss recognized in previous periods is reversed if the reasons for the impairment no longer exist. However, a reversal will not be higher than the carrying amount would have been if an impairment loss had not been recognized in previous periods. Goodwill is subject to annual impairment testing even if there are no indications of impairment. The carrying amount of goodwill is allocated to cash generating units. When testing for impairment of goodwill, the assets are grouped in cash-generating units and assessments are made on the basis of these units' future cash flows. Impairment losses on goodwill are not reversed. All impairment losses, and any reversals of the same, are recognized in the income statement.

Estimates and assessment

For the Group, the most significant estimates and assumptions are those relating to impairment testing of goodwill. This means that the effect on the financial reports may be considerable if the estimates and assessments made would prove to deviate significantly from the actual outcome. In connection with impairment testing of goodwill the carrying amount is compared with the recoverable amount. The recoverable amount is determined by the higher of an asset's net realizable value and its value in use. Normally, it is not possible to determine the net realizable value. Therefore, the value in use is normally the value being compared with the carrying amount. Thus, each cash generating unit's value in use is calculated in assessing any impairment of goodwill. Calculations are performed through discounting future estimated cash flows. In order to perform the calculations a number of assumptions concerning future circumstances and estimates of parameters are made, for example growth and discount rate. Any adjustments of the assumptions made could have an effect on the carrying amount of the goodwill. Assuming a lower growth rate would lead to a lower recoverable amount. A higher discount rate would also lead to a lower recoverable amount. Goodwill amounted to 7 609, 4 TEUR (2018: 7 609,4 TEUR).

During the year the Group recognised Intangible Customer Relations assets of 4,017 TEUR NBV after amortisation and; the Goodwill shows a balance of 7 609 TEUR in 2018, (2018: 7 609 TEUR), as there were no impairments in both periods.

Notes to the financial statements (continued)

Other intangible assets mainly relate to technology acquired through business combinations, as well as other capitalised costs such as software and branding licences.

Notes to the financial statements (continued)

11 Impairment test of Goodwill

Goodwill is tested for impairment every year in order to assure that the carrying amount of each of the Group's cash-generating units is not higher than its recoverable amount. The Group's cash-generating units equal the geographic regions, which also constitute the Group's operating segments. The carrying amount equals capital employed and the recoverable amount for each cash-generating unit is determined based on a calculation of value in use for each unit. The allocation of goodwill to cash-generating units (operating segments) is shown in the following table.

Goodwill by segment

TEUR	December 31, 2019	December 31, 2018
Africa	5 398,1	5 398,1
Middle East	941,8	941,8
Europe	1 269,5	1 269,5
Total	7 609,4	7 609,4

The Group acquired the following subsidiaries in the below table. The acquired companies are active in the Cybersecurity industry as Software Resellers and Distributors and providers of overall Cybersecurity solutions. The Acquisitions are in line with the overall strategy of the Cyber1 AB Group.

Final Acquisition analysis	Dynamics Recovery Services	Credence SA	Credence (UAE)	Professional Technologies Ltd	Credence UK	Intact Software (PTY)	ITWAY'S	Total
% of shares acquired	74%	100%	100%	100%	100%	100%	100%	
Value acquired assets	2 443,7	328,8	2 023,9	678,4	123,1	190,2	11 457,3	17 245,4
Value acquired liabilities	-1 960,0	-311,2	-1 900,2	-476,4	-56,1	-143,2	-8 059,8	-12 906,9

Adjustment Fair Value of Assets and Liabilities	-1 022,4	-37,2	-261,5	-427,0	-81,7	-	1 159,0	-670,7
Purchase consideration (Allocated based on Fair Value of net Assets)	3 162,5	107,2	804,0	1 286,4	275,0	235,0	10 000,0	15870,1
Add in of NCI NA	-129,3	-	-	-	-	-	-	-129,3
Intangible: Customer relationships							4 463,7	4 463,7
Goodwill	3 571,9	126,8	941,8	1 511,4	289,7	188,0	979,8	7 609,4

Goodwill recognised from this acquisition amount to 7609 TEUR and is attributable to the workforce and the profitability of the acquired business.

The group recognised the non-controlling interests Dynamic Recovery Services (Pty) Ltd at its fair value, therefore the recognised value of the non-controlling interests its proportionate share of the acquired net identifiable assets. See note 1.4 for the group's accounting policies for business combinations.

Notes to the financial statements (continued)

Note 11 Impairment test (continued)

Below table is a summary of paid considerations for the acquisitions as well as the Fair Value of acquired Assets and Liabilities.

Purchase Consideration	Group
	2019
Consideration	€ 000
Fair Value of Non-Controlling Interest	-129,3
Cash Consideration	3 908,2
Non-Cash Consideration	11 962,0
Total Consideration	15 740,9
Less total net assets	4 338,5
Adjustment Fair Value of Assets and Liabilities	-670,7
Intangible: Customer relationships	<u>4 463,7</u>
Goodwill	<u>7 609,4</u>

Goodwill shows a balance of 7609,4 TEUR in both 2019 and 2018. There were no impairments in both periods.

None of the recognised Goodwill will be deductible for corporate income tax purposes.

Impairment testing of Goodwill

Recognised Goodwill has an indefinite useful life, Management therefore tests Goodwill annually for impairment or at any time an impairment indicator is identified.

The recoverable Value for Goodwill with an indefinite live has been calculated based on the Value in use that management expects to realise. The value in use has been calculated based on the future expected cash flows generated in the five-year period 2020 to 2024. Future expected cashflows were identified as follows:

- 2020: Free Cash Flows detailed in the 2019 Business Plan that was approved by the Board of Directors.
- 2020-2024: Free Cash Flows based on an assumed p.a growth in Free Cash Flow of 5% from the 2020 level.
- Terminal value after 2024 estimates a growth rate of 2%

The growth rate assumed for the period 2019-2023 does not exceed the long-term growth rate for the markets in which the businesses operate in. Key assumptions used are based on management's experience.

Key assumptions in the determination of the Value in Use of Goodwill

2019-12-31	Africa	United Arab Emirates	Europe
Growth rate 2020-2024	5%	5%	5%
WACC	12.4%	11.9%	12.1%
2018-12-31			
Growth rate 2019-2023	5%	5%	5%
WACC	12.4%	10.4%	12.3%

The value in use for each unit is derived from discounted cash flows, based on estimated future cash flows. The estimates are based on the current financial actuals and expected future development up to five years. Assumptions regarding sales volume, sales prices, operating expenses and product mix form the basis for estimated future growth and margin development. Volume assumptions are based on historical outcome, the executive management's expectations on market development, and expected global market growth. Price assumptions are based on current market trends and inflation forecasts. Margin development is based on current margin levels and product mix adjusted for expected price changes and possible changes in the product mix. For periods to five years, the extrapolation of expected cash flows has been assumed to be a prudent 5 percent (2018:5%), which is considered within anticipated industry growth. The cash flows have been discounted using average pre-tax interest rate of 12.13 percent (2018:11.7%). The interest rate corresponds to the Group's current weighted cost of capital (WACC) and is based on current market assessments. Impairment testing is performed annual, after the budget and forecast business plans have been determined by the executive management. The 2019 (2018) test showed that there is no impairment

Notes to the financial statements (continued)

Note 11 Impairment test(continued)

Allocation of Goodwill to CGU (cash generating unit)'s	2019-12-31	2018-12-31
Africa	5 398	5 398
United Arab Emirates	942	942
Europe	1 269	1 269
Total	7 609	7 609

Sensitivity analyses have been carried out with regard to the discount rate (risk) and long-term growth with a general reduction in the growth rate after five years of 2 percentage points (2) (implying an assumption of zero growth) and a general increase in the weighted capital cost of 2 percentage points (2018:2). The sensitivity analyses did not demonstrate any impairment; neither an increase in the WACC to 14.5% or a reduction of growth rate for free cash flows to 1% for the period 2020-2024 would on their own be sufficient to trigger an impairment of Goodwill.

In addition to the annual impairment test, goodwill is tested whenever there are indications of impairment.

12 Tangible fixed assets

	2019	2018
	€'000	€'000
Property, plant and equipment		
Cost at beginning of year	624,2	450,3
Purchases/investments	287,0	173,9
Cost at end of year	911,2	624,2
Accumulated depreciation at beginning of year	-418,7	-325,3
Depreciation for the year	-310,7	-93,4
Accumulated depreciation at end of year	-729,4	-418,7
Net carrying value at end of year	181,8	205,5

Depreciation charges on tangible assets are included in administrative expenses in the income statement and amounts to 310,7 TEUR (2018: 93,4 TEUR). No borrowing costs have been capitalized during 2019 nor during 2018.

13 Leases

The Group is lessee for a number of assets where real estate leases, such as rental of office premises, and warehouses, represent the major part of the total value of leases. The Group's leases also include storages etc. with the exception of short-term leases and leases of low-value, each lease is reflected on the balance sheet as a right-of-use asset and a lease liability. Lease payments are generally fixed, but a limited number of real estate leases are linked to periodic changes in an index. Variable lease payments, which do not depend on an index or a rate, are excluded from the initial measurement of the lease liabilities and assets.

Some leases contain options to extend the lease for one or more terms or to terminate the lease. Assessment of the likelihood of using extension or termination options are made and the amount of optional lease payments not included in the lease liabilities at December 31, 2019.

Notes to the financial statements (continued)

Note 13 Leases(continued)

The average duration of the Group's lease liability was 2.3 years, including assessments of the likelihood of utilizing extension and termination options.

Leases at December 31 comprised the following:

Right-of-use assets

Itway Hellas S.L. A	004012101000	Greece	100%	100%	5 175,8	5 000,0
Itway Turkyie Ltd	663346	Turkey	100%	100%	5 175,8	5 000,0
Total					14 357,5	14 258,2

The principle activity of all subsidiaries is to market and sell solutions to increase safety on the internet and to sell products and services in this area.

Impairment test

Investments in subsidiaries are measured in the parent company's financial statements at cost price. If there is an indication of impairment, the recoverable amount of the asset is calculated. The recoverable amount is the highest of the fair value or value in use.

The carrying amount for investments in subsidiaries amounts to TEUR 14,357,5 as at 31 December 2019 (TEUR 4,258,2 as at 31 December 2018).

The group has realised a loss of TEUR 252,2 in 2019 in accordance with budget and plan. Expectations for the next years are aiming to generate sales above MEUR 262,39 in 2024, supported by the strong underlying market. Cyber1 targets a gross margin exceeding 35 percent in the medium term

The group's activities are primarily carried out in Dynamics Recovery Services (DRS) with a booked amount of TEUR 1 248 as at 31 December 2019, and in a smaller scale in Credence SA with a booked amount of TEUR 29 as at 31 December 2019. Cyber1 Group AB's sole activity is holding of shares in subsidiaries and associates as well as the stock listing on NASDAQ First North.

Notes to the financial statements (continued)

Note 14 Investment in subsidiaries (continued)

Based on the market value of Cyber1 Group AB on NASDAQ First North in Stockholm management assesses there is enough headroom between the recoverable amount and the carrying amount of the subsidiaries as at 31 December 2019.

Furthermore, management has prepared impairment tests on all the subsidiaries listed below based on the discounted cash flow model reflecting the financial targets for the coming five-year period, market reports on future growth and technology trends. Management has applied a five-year period to reflect the long-term approach to customers' purchasing decisions. Cash flows for the five-year period are extrapolated using an estimated growth rate of 5% (2018:5%).

The impairment tests indicate that there is significant headroom between the recoverable amounts and the carrying amounts of the shares in subsidiaries as at 31 December 2019

*Notes to the financial statements (continued)***15 Discontinued Operations**

At the end of 2018, management decided to discontinue its operations in Austria and Germany and restructured its activities in line with the Group's strategy to focus and develop its advisory & MSSP business in other regions within Cyber1 business environments. Consequently, assets and liabilities allocable to GmbH Austria and Germany were classified as a disposal group. Revenue and expenses, gains and losses relating to the discontinuation of these subgroup have been eliminated from profit or loss from the Group's continuing operations and are shown as a single line item in the statement of profit or loss.

Operating profit of GmbH Austria and Germany until the date of disposal and the profit or loss from re-measurement of assets and liabilities classified as disposal are summarised as follows

The discontinued operations impacted the income statement as follows:

TEUR	2019	2018
	€'000	€'000
Revenue	250,2	1 566,6
Cost of sales	-46,6	-105,3
Gross profit	203,6	1 461,2
Costs	-402,5	-2 387,7
Earnings before interest and tax (EBIT)	-198,9	-926,4
Financials	111,0	527,2
Earnings before tax (EBT)	-87,9	-399,2
Tax on net loss for the period	-0,4	-1,8
Net loss for the period	-88,3	-401,0
Write-down to fair value less cost to sell	-321,2	-
Net loss of discontinued operations	-409,5	-401,0
Earnings from discontinued operations in EUR per share outstanding (EPS)	-0.0017	-0.0015
Diluted earnings from discontinued operations in EUR per share outstanding (EPS-D)	-0.0017	-0.0015

Divestment of subsidiaries

On April 16, 2020, Cyber 1 announced that Itway S.P.A reassumed ownership of the subsidiaries Itway Turkey and Itway Greece. As part of the transaction, the parties agreed that Cyber1 paid a total of MEUR 2.6m in cash and delivered a total of 16, 666, 666 Cyber1 shares at €0.48 per share to Itway S.p.A; pursuant to the agreements underpinning the transaction. Despite having delivered on certain aspects Cyber1 was following a protracted, and in the end unfortunately unsuccessful negotiation with Itway S.p.A, ultimately not able to honour certain post-completion conditions of the transaction. Itway S.p.A have therefore, in accordance with the terms of the agreements, notified the Company of their immediate exercise of the option to reacquire the assets. See Note 26 for further details,

2019 and 2018 the Itway Turkey and Itway Greece are included in continuing operations.

Notes to the financial statements (continued)

16 Inventories

Inventories are valued in accordance with the 'first in, first out' principle and at the lower of cost and net realizable value. Internal profits arising from deliveries between Group companies are eliminated upon consolidation.

INVENTORIES

TEUR	Group	
	December 31, 2019	December 31, 2018
Consignment & Components	224,5	775,3
Work in progress	-	-
Finished goods	-	-
Total	224,5	775,3

Impairment of inventories during the year amounted to Nil (2018: €nil). In the income statement this is reported as cost of products sold

There were no impairments in 2019 and 2018.

17 Trade and other receivables

	Group 2019 €'000	Group 2018 €'000	Parent 2019 €'000	Parent 2018 €'000
Trade debtors	27 107,7	18 181,1	1 633,3	451,0
Pre-payment of supplier invoices	-	-	-	-
Prepaid rent	-	-	-	-
Tax receivable	292,3	143,4	-	-
Amounts owed by Group Undertakings	-	-	4 177,0	3 175,5
Other receivables	-	-	-	-
Less provision for impairment of trade receivables	(156,7)	(332,5)	(156,7)	(332,5)
Net Total	27 243,3	17 992,0	5 653,6	3 294,0

Movements on the group provision for impairment of trade receivables are as follows:

Trade receivable provision	2019	2018
Carrying value at beginning of year	-	-
Allowances for losses during year	156,7	332,5
Recovery	-	-
Write down	-	-
Carrying value at end of year	156,7	332,5

As of December 2019, trade receivables of 14 060,7 TEUR (2018: 9 311,9) were past due and 156,7 (332,5) TEUR were impaired. The aging of trade receivables is as follows:

Notes to the financial statements (continued)

Note 17 Trade and other receivables(continued)

Ageing of trade receivables	2019	2018
Current	14 420,2	6 810,2
Overdue< 31 days	2 887,9	1 726,5
Overdue 31-90 days	9 642,9	9 311,9
Overdue > 90 days	156,7	332,5
	27 107,7	18 181,1

The remaining trade and other receivables do not contain impaired assets as these are not past due. Based on the credit history of these other classes, it is expected that these amounts will be received when due. The group does not hold any collateral in relation to these receivables.

Trade receivables are generally held in domestic currencies, which have an insignificant impact on the foreign currency risk. The provision for account receivables mainly pertains to doubtful customer account receivables that have the potential risk for not being collected. The credit risks of the Group's trade receivables are deemed to be low. For more information see Note 20 Financial instruments and financial risks.

19 Non-Controlling interest

The following is summarised financial information for Dynamic Recovery Services (Pty) Ltd, prepared in accordance with IFRS. The information is before inter-company eliminations. Cyber1 owns 74% of the Share capital and voting rights in its South African subsidiary Dynamic Recovery Solutions (Pty) Ltd. The Non-controlling interest in Dynamic Recovery Services (Pty) Ltd is 26% and is owned by the EMM Share Trust. The trust is entitled to receive its proportionate Share of any dividend distribution. No dividend payments made in 2019 and 2018 to the Non-controlling interest related to Cyber1's acquisition of Dynamic Recovery Solutions (Pty) Ltd.

The non-controlling interest held by the EMM Share trust ensures that Dynamic Recovery Services (Pty) Ltd complies with the South African Broad-Based Black Economic Empowerment Act (52/2003).

20 Financial instruments and financial risk management

Financial Risk Management in the Cyber1 Group

Due to its activities, the Group is exposed to various financial risks, including changes in foreign currency, interest, liquidity and credit risks. The Group manages the risks centrally and follows the policies approved by the Board of Directors. The Group does not actively engage in speculation of financial risks.

During the spring of 2020, the financial impact of the Covid-19 virus was apparent within a number of industries. As regards to our business, there has been a marginal effect to date and we also have a sound pipeline in established jurisdictions, though it is difficult to make an assessment of the long-term effect as we are only in the initial phases of this situation.

Credit risks

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Group is exposed to credit risk from its operating activities which mainly relate to contract work in progress, trade receivables and other receivables, and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments. Maximum exposure corresponds to the carrying amount. For sale of products an advance payment is received from the customer.

Notes to the financial statements (continued)

Note 20 Financial instruments and financial risk management (continued)

On 1 January 2018, the group implemented IFRS 9 which allows for an assessment of impairment needs regarding impairment of financial assets measured at amortized cost, including trade receivables and contract work, according to the simplified expected credit loss model. The model entails that the expected loss over the asset's useful life is recognised immediately in the income statement and monitored on an ongoing basis according to the group's risk management until realization. Impairment is computed based on expected loss rates which are stated individually, distributed by geographical location. Loss rates are computed on the basis of historical data. This data is based on expected loss over the total maturity of the amount receivable, corrected for estimates of the effect of expected changes in relevant parameters, for instance financial development, political risks etc. on the market in question

The Group assesses the risks of losses on an ongoing basis and, if necessary, write-downs are made according to the Group's policies. Excess cash is placed with banks with ratings A or above. As of today, a material part of the Group's sales and revenue is generated from customers. There is a risk that customers do not place orders or otherwise fulfil their respective undertakings due to e.g. lack of financial resources or other circumstances beyond the Company's control. Should the Group lose business from all or some of its top customers it may have an adverse impact on the Group's business, financial position and profits in the future. Credit quality of a customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. Outstanding customer receivables are regularly monitored and any deliveries to major customers are generally covered by letters of credit or other forms of credit insurance.

The Group's customers are both public and private enterprises. Total trade receivables amount to TEUR 26 951,0 (2018: TEUR 17 848,6) as at 31 December 2019.

An impairment analysis is performed at each reporting date. The management assesses credit risk in relation to the individual customer, taking into account whether they are public customers who are deemed to have a lower credit risk than industry customers. Except from the increased risks mentioned in note 3, the Group evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions. The Group's activities take place in the global market and management does not distinguish between customers' geographical affiliations in the credit risk assessment. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets disclosed in Note 17.

Foreign exchange risks

The Group's sales, cost of goods sold, and expenses are mainly incurred in ZAR, AED, KES, USD, TRY, GBP or SEK. The Group has transactions in other currencies, but exposure in those currencies is not significant. There is no foreign currency hedging regarding transactions in foreign currency.

- A change in foreign exchange rates of +/- 16% in the subsidiaries in ZAR will have an effect on result and equity before tax on TEUR 102,6.
- A change in foreign exchange rates of +/- 6% in the subsidiaries in TRY will have an effect on result and equity before tax on TEUR 38,5.
- A change in foreign exchange rates of +/- 4% in the subsidiaries in AED will have an effect on result and equity before tax on TEUR 25,6.
- A change in foreign exchange rates of +/- 10% in the subsidiaries in SEK will have an effect on result and equity before tax on TEUR 64,1.
- A change in foreign exchange rates of +/- 1% in the subsidiaries in GBP will have an effect on result and equity before tax on TEUR 5,1.
- A change in foreign exchange rates of +/- 1% in the subsidiaries in USD will have an effect on result and equity before tax on TEUR 6,4.

Interest rate risk

The Group's loans are carried at variable interest rates. A change in the interest level will have limited effect on the result or equity.

- A change in the interest of +/- 1% will have an effect in 2019 on result and equity before tax on TEUR 26,7.

Notes to the financial statements (continued)

Note 20 Financial instruments and financial risk management (continued)

Liquidity risk

Funding and adequate liquidity are fundamental factors in driving an expanding business, and management of both is an integrated part of the Group's continuous budget and forecasting process. To ensure focus on managing the risks related to funding and liquidity, the Group manages and monitors funding and liquidity and ensures the availability of required liquidity through cash management and borrowing facilities.

By constantly maintaining cash assets or unused credit facilities, the Group ensures it has sound payment capacity which reduces the liquidity risk. Payment capacity, i.e. cash from the capital increases and cash equivalents as well as unused credit facilities as at 31 December 2019 was TEUR 2 437,5 (TEUR 5 924,2 in 2018).

The Group's other financing consists of an offset funding loan from potential shareholders. The loan bears a floating rate, 3.0% and 3.3% p.a. as at 31 December 2019. The loan can be redeemed by the Group at par value at any time and is subject to change of control and transfer of assets clauses.

Group

	0-1-year TEUR	1-5 years TEUR	Total TEUR	Carrying amount TEUR
31 December 2019				
Borrowings from credit institutions	635,1	-	635,1	638,2
Other loans	2 148,5	603,5	2 752,0	2 765,8
Trade and other payables	21 896,0	-	21 896,0	21 896,0
	24 679,6	603,5	25 283,1	25 300,0
31 December 2018				
Borrowings from credit institutions	-	-	-	-
Other loans	1 012,7	603,5	1 616,2	1 630,2
Trade and other payables	20 994,2	-	20 994,2	20 994,2
	22 006,9	603,5	22 610,4	22 624,4

Fair value of the Offset loan is determined to be equal to its carrying amount (level 3 in the fair value hierarchy). Fair value of short-term liabilities is determined to equal their carrying amount.

The analysis is based on all undiscounted cash flows, including estimated interest payments and expected instalments on loans. The estimates on interest are based on current market conditions.

The payment obligations are expected to be settled through cash inflows from operating activities and through proceeds from capital injections.

Fair value of credit institutions and other loans are deemed to be equal to the total carrying amount, as these items based on market rate.

Notes to the financial statements (continued)

Note 20 Financial instruments and financial risk management (continued)

Classification of financial assets and liabilities (continued)

The fair values of financial instruments which are not traded in an active market are determined with the help of valuation techniques. Market data is used as far as possible when such data is available. If all significant inputs required for the fair value measurement of an instrument are observable, the instrument belongs to Level 2.

In cases where one or several significant inputs are not based on observable market information, the instrument is classified as Level 3.

The above table shows financial instruments carried at fair value based on their classification in the fair value hierarchy. The different levels are defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1)
- Inputs other than quoted market prices included in Level 1 that are observable for the asset or liability, either directly in the form of quoted prices or indirectly, i.e. derived from quoted prices (Level 2)
- Inputs for the asset or liability which are not based on observable market data (non-observable inputs) (Level 3).

In 2018, no transfers between levels were made.

21 Share capital

Per 31 December 2019 Cyber1 registered Share capital consisted of 295.5 Million Shares (2018: 292.2 Million Shares) and amounted to 834 TSEK (2018: 782 TSEK). Cyber1 shares are denominated in Euros.

To facilitate an analysis of changes in the number of issued Shares and the Share capital for both 2019 and 2018; Share capital, as presented in the Primary Financial Statements are presented at the exchange rate per 31 December 2019, which was 10.82 SEK per EUR (2018: 10.21). As at 31 December 2019 the par value of each Share is 0.0026 SEK (2018: 0.0018) or 0.00002618 EUR (2018: 0.00002618).

Each Share has one vote.

The Share capital detailed in the annual accounts is the Share capital which was registered on the 31 December 2019 and 2018 respectively.

*Notes to the financial statements(continued)***22 Earnings per Share**

	2019	2018
Net result attributable to shareholders of the Parent (€ 000)	(1 536)	(2 475)
Weighted average number of ordinary shares in issue (Thousands)	294 677	273 959
Basic earnings per share (€ per share)	(0.0052)	(0.0090)

The group has no dilutive potential ordinary shares. Therefore, the diluted earnings per share is the same as the basic earnings per share

Cyber1 paid no Dividends in 2019 or 2018.

23 Equity**Objectives, policies and processes for managing capital**

The Board of Directors of Cyber Security 1 AB has concluded that in view of the good and stable prospects for the business the financial policy is that the Group will strive to maintain a net debt that does not exceed three times EBITA. Excess funds shall be returned to shareholders through dividends and share repurchases.

Share Capital

All shares are of the same class and carry the same voting rights. All shares are paid in full. All shares carry the same entitlement to the company's assets and profit. There are no restrictions on the transferability of the shares according to the law or the Articles of Association

Other Contribution Capital

Other contributed capital pertains to equity contributed by the owners and includes share premium reserves.

Foreign currency translation of subsidiaries

The foreign currency translation reserve covers all exchange differences arising on translation of the financial statements of foreign operations that are presented in a currency other than that used for presentation of the consolidated financial statements. The Parent Company and the Group present their financial statements in EUR. When a foreign subsidiary is divested, accumulated exchange rate effects are included as part of the capital gain.

Notes to the financial statements(continued)

24 Operating Lease commitments

The Group’s future minimum lease payments under the terms of non-cancellable operating lease agreements which initial or remaining terms of one year or more fall due as follows:

Minimum lease payment	2019	2018
Within one year	565,0	455,0
Between 1–5 years	1 695,0	1 290,0
Later than 5 years	-	-
Total	2 260,0	1 745,0

	Falling due within 1 year	Falling due between 2-5 years	Falling due in more than 5 years
	€'000	€'000	€'000
Africa	444,0	1 332,0	-
Middle East	48,0	144,0	-
Europe	73,0	219,0	-
Total	565,0	1 695,0	-

Commitments under signed leases and lease costs are included in the table above since after testing they were classified as operating leases.

Refers to costs for assets held through operating leases, such as rented premises, vehicles, other machinery and equipment.

25 Related party transactions

The Group’s related parties include associated companies and key management personnel with significant influence over the Group. Key management personnel with significant influence over the Group are Cyber1 Board of Directors and members of the Group Management Team. Related parties’ transactions are conducted at an arms-length basis. For further information about the Group’s transactions with associated companies see Note 14.

Information about remuneration to the Board of Directors and Group Management Team, see Note 6 Personnel.

Besides this and disregarding intergroup transactions that are eliminated in the consolidated financial statements of the Group, no other related parties’ transactions have been conducted during the year. Transactions with related parties are based on established commercial terms for the industry and are entered into under normal commercial terms. Refer to Note 6 for information about salaries and other benefits, expenses and commitments in terms of pensions and similar benefits for the Board, the CEO and other senior executives.

The Group’s subsidiaries in South Africa leasehold Office Premises that was formerly a related party, but transactions now take place on market terms. However, the premises were leased via a company that is controlled by the then former Group’s CEO; cannot be deemed to be related parties.

Related parties also comprise subsidiaries in which Cyber1 Group has controlling influence.

The company’s substantial shareholders do not have different voting rights. Cyber1, so far as is known by the company, is not directly or indirectly owned or controlled by another corporation or by any individual. Cyber1 knows of no arrangements, the operation of which may at a subsequent date result in a change of control of the company.

26 Events After the Balance -sheet date

Election Board

On 28th January 2020 a new board of Directors were elected; the following members were

- Daryn Stilwell, Executive Board member
- Antoine Karam, Non-executive Board member
- Frank Kamsteeg, Non-executive Board member
- Corné Melissen Non-executive Board member
- Robert Blasé Non-executive Board member
- Thomas Bennett Non-executive Board member

and Daryn Stilwell was appointed as (CEO) Chief Executive Office of Cyber Security 1 AB at a subsequent meeting of the new board of directors

Acquisition and Divestment

Divestment of Itway Greece & Turkey

On April 16, 2020, CYBER1 announced that Itway S.P.A reassumed ownership of the subsidiaries Itway Turkey and Itway Greece. As part of the transaction, the parties agreed that CYBER1 paid a total of MEUR 2.6m in cash and delivered a total of 16,666, 666 CYBER1 shares at €0.48 per share to Itway S.p.A; pursuant to the agreements underpinning the transactions. Despite having delivered on certain aspects CYBER1 was hoping for prolong extension, and in the end unfortunately, due to unsuccessful negotiations with Itway S.p.A, ultimately not able to honour certain post-completion conditions of the transaction. Itway S.p.A have therefore, in accordance with the terms of the agreements, notified the Company of their immediate exercise of the option to reacquire the assets. The divestment is due to be completed.

Itway Turkey and Itway Greece as at 31 December 2019 represented revenues of MEUR 30,59 and 1,62 in EBITDA.

Notes to the financial statements(continued)**Note 26 Events After the Balance -sheet date (continued)****Reorganisation / reconstruction process**

On May 12, 2020 the Stockholm District Court (SDC) approved Cyber Security 1 AB 's application for corporate restructuring. This will permit Cyber1 board to evaluate various options available and restore confidence its investors, external stakeholders and internal operational stability.

The Corporate Reorganisation Proceedings (företagsrekonstruktion) will allow the company a period of up to 3 months (which may be extended) to agree a compromise with its creditors and a suitable payment plan of up to 12 months going forward.

Throughout the period of reorganisation, the Cyber1 Group listed status on the Nasdaq First North Growth Market exchange will not be affected and will continue to trade as normal (with some actions requiring the consent of the administrator where the position of existing creditors may be concerned) and such the process does not affect the day to day operations of Cyber1 or any of its subsidiaries.

In view of the Board of Directors the application for Corporate Reorganisation Proceedings (företagsrekonstruktion) is the best option, given the stable underlying business operations, to provide Cyber1 with the stable platform to encourage investment, to address the challenges identified above and to allow the management of the Group to implement Operation Atlas.

Legal proceedings and disputes

The Group recognises a liability when a legal obligation exists, and it is likely that an outflow of financial resources will be required to settle the obligation and a reliable estimate of the amount can be made. Outstanding legal issues are reviewed on a continuous basis to determine the need to set aside provisions in the financial statements. During these reviews, all cases are taken into consideration using the Group's internal legal competence and, when necessary, external legal counsel is also consulted. Insofar as the judgements concerning the factors considered do not correspond to the actual outcome, the financial statements may be affected.

Taxes

Changes in tax legislation in Sweden and other countries where Cyber Security 1 AB conducts business may change the amount of recognised tax liabilities and tax assets. Interpretations of current tax legislation may also affect the recognised tax liability/tax asset.

Judgments are made to determine both current and deferred tax liabilities/tax assets, particularly with respect to the value of deferred tax assets. Judgments are made as to whether the deferred tax assets will be utilised to offset future taxable income. The actual result may differ from these judgments, partly due to changes in business climate, changed tax legislation and the outcome of not yet completed examinations of tax returns by tax courts.

COVID-19 Business Impact

On March 11, 2020, the global outbreak of coronavirus was characterised as a pandemic by the World Health Organization (WHO). The COVID-19 pandemic has had an extraordinary impact on Cyber1's business during 2020, but the extent and duration of the impact is not clear at this time

Cyber1's business is structurally well-suited for the COVID-19 pandemic. Over 60% of Cyber1's revenue is from the public sector, and a majority of the remaining revenue is from large corporate customers. This customer base is likely to maintain cybercrime spending during the COVID-19 pandemic and any economic downturn which may result.

The impact of COVID-19 on business has been less clear. Growth in sales revenue of Cyber1's advisory consulting services flattened in March, while growth in value-added distribution remained steady in all regions, but this was due to factors which predate the COVID-19 pandemic.

At the end of March, Cyber1 had a significantly higher order backlog for product deliveries in Q2 than it did at the same time last year. However, Cyber1 has limited visibility as to how COVID-19 may impact order intake and delivery of cybercrime solutions and services after the next 12 months.

27 Appropriation of Current Year Loss for Cyber1

The below funds and proposed treatment of them is to be decided at the company's annual general meeting.

Free Equity	€ 15 255 719,39
Current year Loss	€ (3 235 689,96)
Total	€ 12 020 029,44

The board proposes that the available funds are carried forward.
To be brought forward € 12 020 029,44

28 Approval of Annual Report

The Board of Directors and the CEO hereby affirm that the Annual Report has been prepared in accordance with generally accepted accounting policies in Sweden and that the consolidated financial statements have been prepared in accordance with international accounting standards as adopted by the European Parliament and Council Regulation (EC) No 1606/2002 of July 19, 2002 in respect of the application of international accounting standards.

The Annual Report and the consolidated financial statements provide a true and fair view of the Parent Company's and the Group's financial position and earnings. The Directors' Report for the Parent Company and the Group provides a true and fair overview of the operations, financial position and results of the Parent Company and the Group and describes material risks and uncertainties facing the Parent Company and the companies that are part of the Group.

The Group's income and financial statements will be submitted to the Annual General Meeting on 30th June 2020 for adoption.

AUDITOR'S REPORT

To the general meeting of the shareholders of Cyber Security 1 AB (publ), corporate identity number 556135-4811

Report on the annual accounts and consolidated accounts

Opinions

We have audited the annual accounts and consolidated accounts of Cyber Security 1 AB (publ) for the financial year 2019.

In our opinion, the annual accounts have been prepared in accordance with the Annual Accounts Act and present fairly, in all material respects, the financial position of Cyber Security 1 AB (publ) as of 31 December 2019 and its financial performance and cash flows for the year then ended in accordance with the Annual Accounts Act. The consolidated accounts have been prepared in accordance with the Annual accounts Act and give a true and fair view of the group's financial position as of December 31, 2019 and its financial performance and cash flows for the year and in accordance with International Financial Reporting Standards (IFRS) as they have been adopted by the EU and the Annual Accounts Act. The statutory administration report is consistent with the other parts of the annual accounts.

We therefore recommend that the general meeting of shareholders adopts the income statement and balance sheet for the parent company and for the group.

Basis for Opinions

We conducted our audit in accordance with International Standards on Auditing (ISA) and generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the Auditor's Responsibilities section. We are independent of the parent company and the group in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Material uncertainty related to going concern

Without affecting our statements above, we would like to draw attention to note 26 in the annual report, which shows that the parent company has initiated a corporate restructuring by decision of the Stockholm District Court on May 12, 2020. The company needs additional external financing. The Board of Directors' report also states that the subsidiaries ITWAY have returned to the buyer and a significant loss has occurred during the first quarter of 2020 for the parent company. These conditions together indicate that there is a significant uncertainty factor that can lead to significant doubts about the Group's ability to continue operations.

Other information

The audit of the consolidated financial statements for the financial year 2018 has been carried out by another auditor who submitted an audit report dated 2019-06-28 with unmodified statements in the Report on the annual accounts and consolidated accounts.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of the annual accounts and consolidated accounts and that they give a fair presentation in accordance with the Annual Accounts Act, and in regards to the consolidated accounts, in accordance with IFRS as they have been adopted by the EU. The Board of Directors and the Managing Director are also responsible for such internal control as they determine is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts and the consolidated accounts, The Board of Directors and the Managing Director are responsible for the assessment of the company's ability to continue as a going concern. They disclose, as applicable, matters related to going concern and using the going concern basis of accounting. The going concern basis of accounting is however not applied if the Board of Directors and the Managing Director intend to liquidate the company, to cease operations, or has no realistic alternative but to do so.

Auditor's responsibility

Our objectives are to obtain reasonable assurance about whether the annual accounts and consolidated accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and generally accepted auditing standards in Sweden will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts and consolidated accounts.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual accounts and consolidated accounts, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of the company's internal control relevant to our audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors and the Managing Director.
- Conclude on the appropriateness of the Board of Directors' and the Managing Director's use of the going concern basis of accounting in preparing the annual accounts and consolidated accounts. We also draw a conclusion, based on the audit evidence obtained, as to whether any material uncertainty exists related to events or conditions that may cast significant doubt on the company's and the group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the annual accounts and consolidated accounts or, if such disclosures are inadequate, to modify our opinion about the annual accounts and consolidated accounts. Our conclusions

are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company and a group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the annual accounts and consolidated accounts, including the disclosures, and whether the annual accounts and consolidated accounts represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient and appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated accounts. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our opinions.

Report on other legal and regulatory requirements

Opinions

In addition to our audit of the annual accounts, we have also audited the administration of the Board of Directors and the Managing Director of Cyber Security 1 AB (publ) for the year the financial year 2019 and the proposed appropriations of the company's profit or loss.

We recommend to the general meeting of shareholders that the profit be appropriated in accordance with the proposal in the statutory administration report and that the members of the Board of Directors and the Managing Director be discharged from liability for the financial year.

Basis for Opinions

We conducted the audit in accordance with generally accepted auditing standards in Sweden. Our responsibilities under those standards are further described in the Auditor's Responsibilities section. We are independent of Cyber Security 1 AB (publ) in accordance with professional ethics for accountants in Sweden and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Responsibilities of the Board of Directors and the Managing Director

The Board of Directors is responsible for the proposal for appropriations of the company's profit or loss. At the proposal of a dividend, this includes an assessment of whether the dividend is justifiable considering the requirements which the company's type of operations, size and risks place on the size of the

company's equity, consolidation requirements, liquidity and position in general.

The Board of Directors is responsible for the company's organization and the administration of the company's affairs. This includes among other things continuous assessment of the company's financial situation and ensuring that the company's organization is designed so that the accounting, management of assets and the company's financial affairs otherwise are controlled in a reassuring manner.

Auditor's responsibility

Our objective concerning the audit of the administration, and thereby our opinion about discharge from liability, is to obtain audit evidence to assess with a reasonable degree of assurance whether any member of the Board of Directors or the Managing Director in any material respect:

- has undertaken any action or been guilty of any omission which can give rise to liability to the company, or
- in any other way has acted in contravention of the Companies Act, the Annual Accounts Act or the Articles of Association.

Our objective concerning the audit of the proposed appropriations of the company's profit or loss, and thereby our opinion about this, is to assess with reasonable degree of assurance whether the proposal is in accordance with the Companies Act.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with generally accepted auditing standards in Sweden will always detect actions or omissions that can give rise to liability to the company, or that the proposed appropriations of the company's profit or loss are not in accordance with the Companies Act.

As part of an audit in accordance with generally accepted auditing standards in Sweden, we exercise professional judgment and maintain professional scepticism throughout the audit. The examination of the administration and the proposed appropriations of the company's profit or loss is based primarily on the audit of the accounts. Additional audit procedures performed are based on our professional judgment with starting point in risk and materiality. This means that we focus the examination on such actions, areas and relationships that are material for the operations and where deviations and violations would have particular importance for the company's situation.

We examine and test decisions undertaken, support for decisions, actions taken and other circumstances that are relevant to our opinion concerning discharge from liability. As a basis for our opinion on the Board of Directors' proposed appropriations of the company's profit or loss we examined whether the proposal is in accordance with the Companies Act.

Remark

Without affecting our opinions, we would like to note that, on several occasions, deducted VAT has not been declared nor paid within the prescribed time periods.
